Subject: Software technology used by BRIC/Boston Regional Intelligence Center
Date: Monday, March 16, 2015 11:12:00 AM

All: in doing more research on 'stuff', I found the following:

If this is known, then excuse my email clutter….if it is new, then interesting reading.

http://www.caseinfosoftware.com/ is the software technology used by BRIC for managing investigative cases

http://www.crimentel.com/ is the software technology used by BRIC to manage criminal intelligence information as defined by 28 CFR Part 23

Fusion Core Solution/FCS (same software technology used by WSFC) is the software technology used by BRIC to manage the tip/lead vetting process.
