Please share this information with others in your Bureau or area:

Beginning Monday, April 6th, you may notice some construction personnel in the building. They will be working in the restrooms and locker rooms to complete the ADA upgrades to the building. The work will take place Monday – Friday from 6:00 a.m. – 4:00 p.m. until sometime in mid-May. Construction personnel will have access to the loading dock and will use the freight elevator for their movement through the building.

All personnel have been instructed to have their ID visible at all times. The contractor cards are yellow and orange and will have the wearer's picture and company name. The companies that will be in the building are Forma Construction, Hammer Construction, Compass Plumbing, and Sustainable Interior. All personnel have been fingerprinted and successfully passed their criminal history check.

If there are any questions, please do not hesitate to call my office. Thank you.

Vickie
