Why You Should *Not* Keep Your Head Down

March 31, 2015

Dear Student of Revolution Golf:

Today's video might shock you a little bit. In essence, one of the most popular statements about how you should swing a golf club is false.

In today's video, Martin Chuck explains why saying "Keep your head down!" to a golfer can be a recipe for disaster. Using the GEARS system to analyze the swing of one of his pupils, he explains why it's better to keep your head "still," not "down."

Click the button below to make your swing more stable than ever!

Click the play button now to learn precisely how to use your head in your swing...
