

The Apparatus of Repression

Washington State's Order of Battle

Overview of System

- Washington State Patrol
- Washington Military Department
- Washington National Guard
- County Sheriffs Offices
- Municipal Police Departments
- Joint Task Forces / FBI
- US Military Installations

Washington State Patrol

- Statewide agency directly answering to the Governor.
- Around 2,655 personnel (1,098 with Badge Numbers) in 2014.
- Eight Districts, each comprising a set of counties.
- Rapid concentration of officers for protests / strikes anywhere statewide.

WSP has several layers:

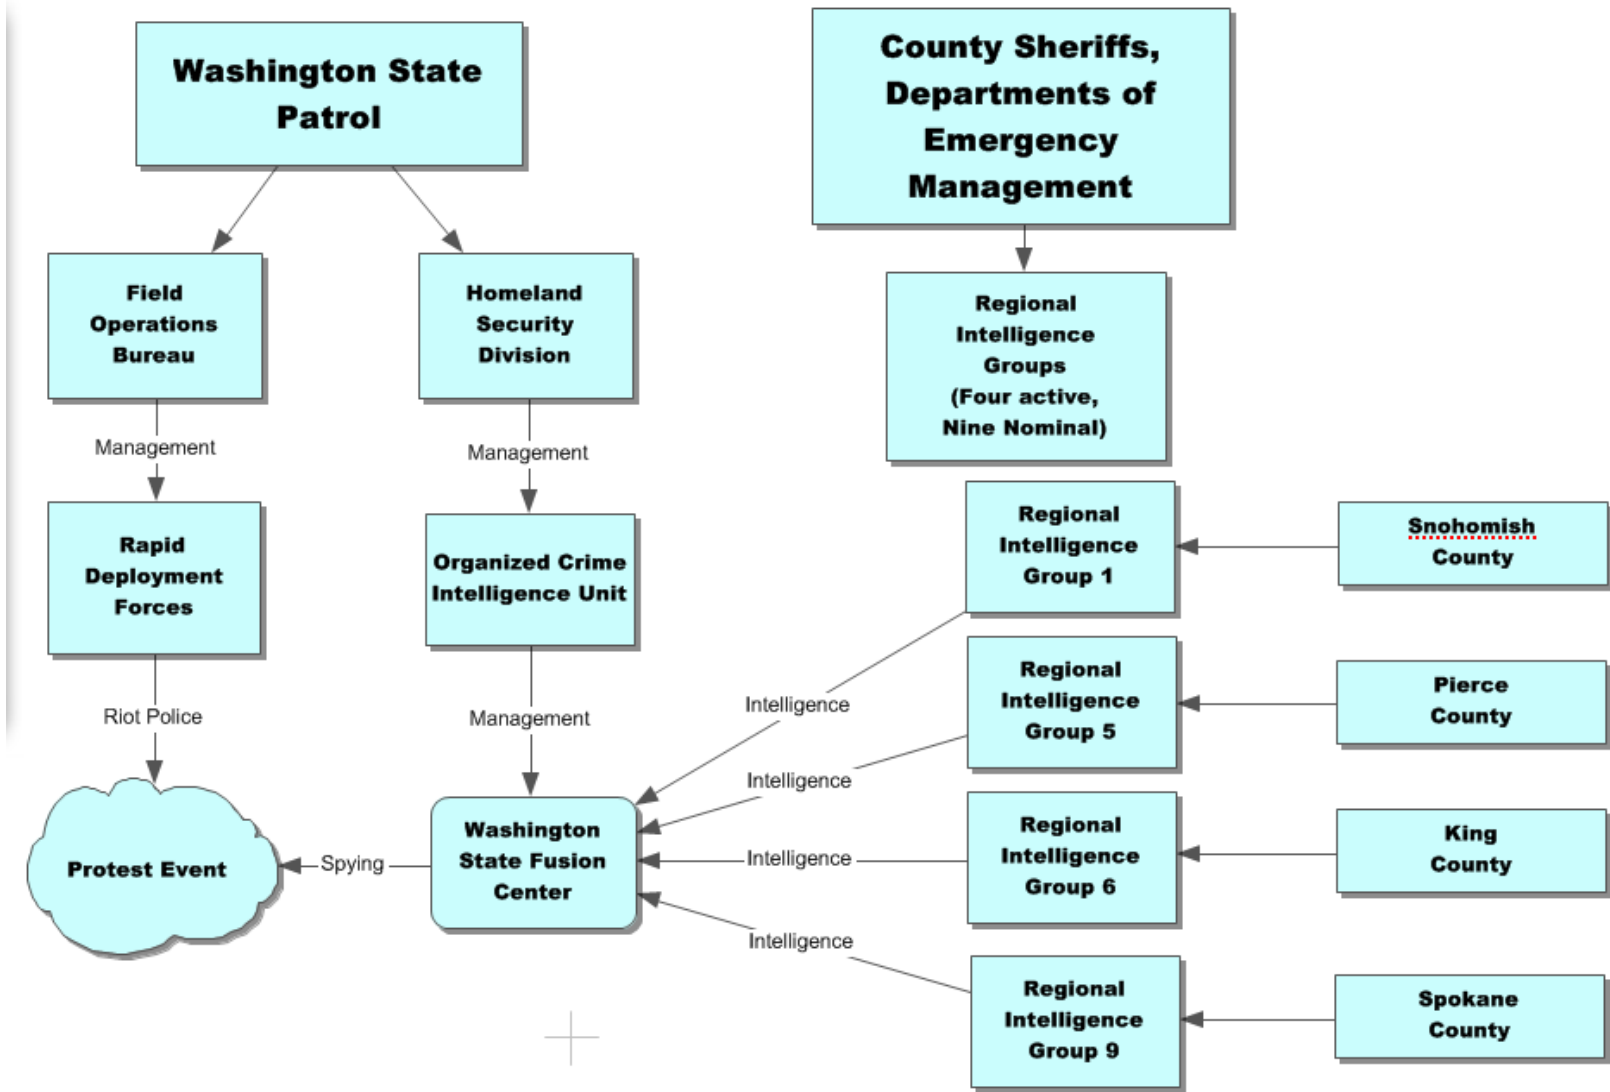

Intelligence Analysis,
Fusion Liaison Officers,
Rapid Deployment Forces,
Aerial Assets,
and regular Troopers

Rank Structure

Rank	Insignia
Chief	★★★★
Deputy Chief	★★★
Assistant Chief	★★
Captain	⦿
Lieutenant	⦿
Sergeant	⦿
Corporal	
Trooper	
Trooper Cadet	

Functional Diagram of some parts

Cops in uniform and in plain clothes

It's often easy to spot plain clothes police at demonstrations by dress and body language which makes them out of place. Grouping with other cops is a tell. Police casual wear also includes the same eyeshades as their uniformed companions.

Police are never neutral at protests

WSP Districts

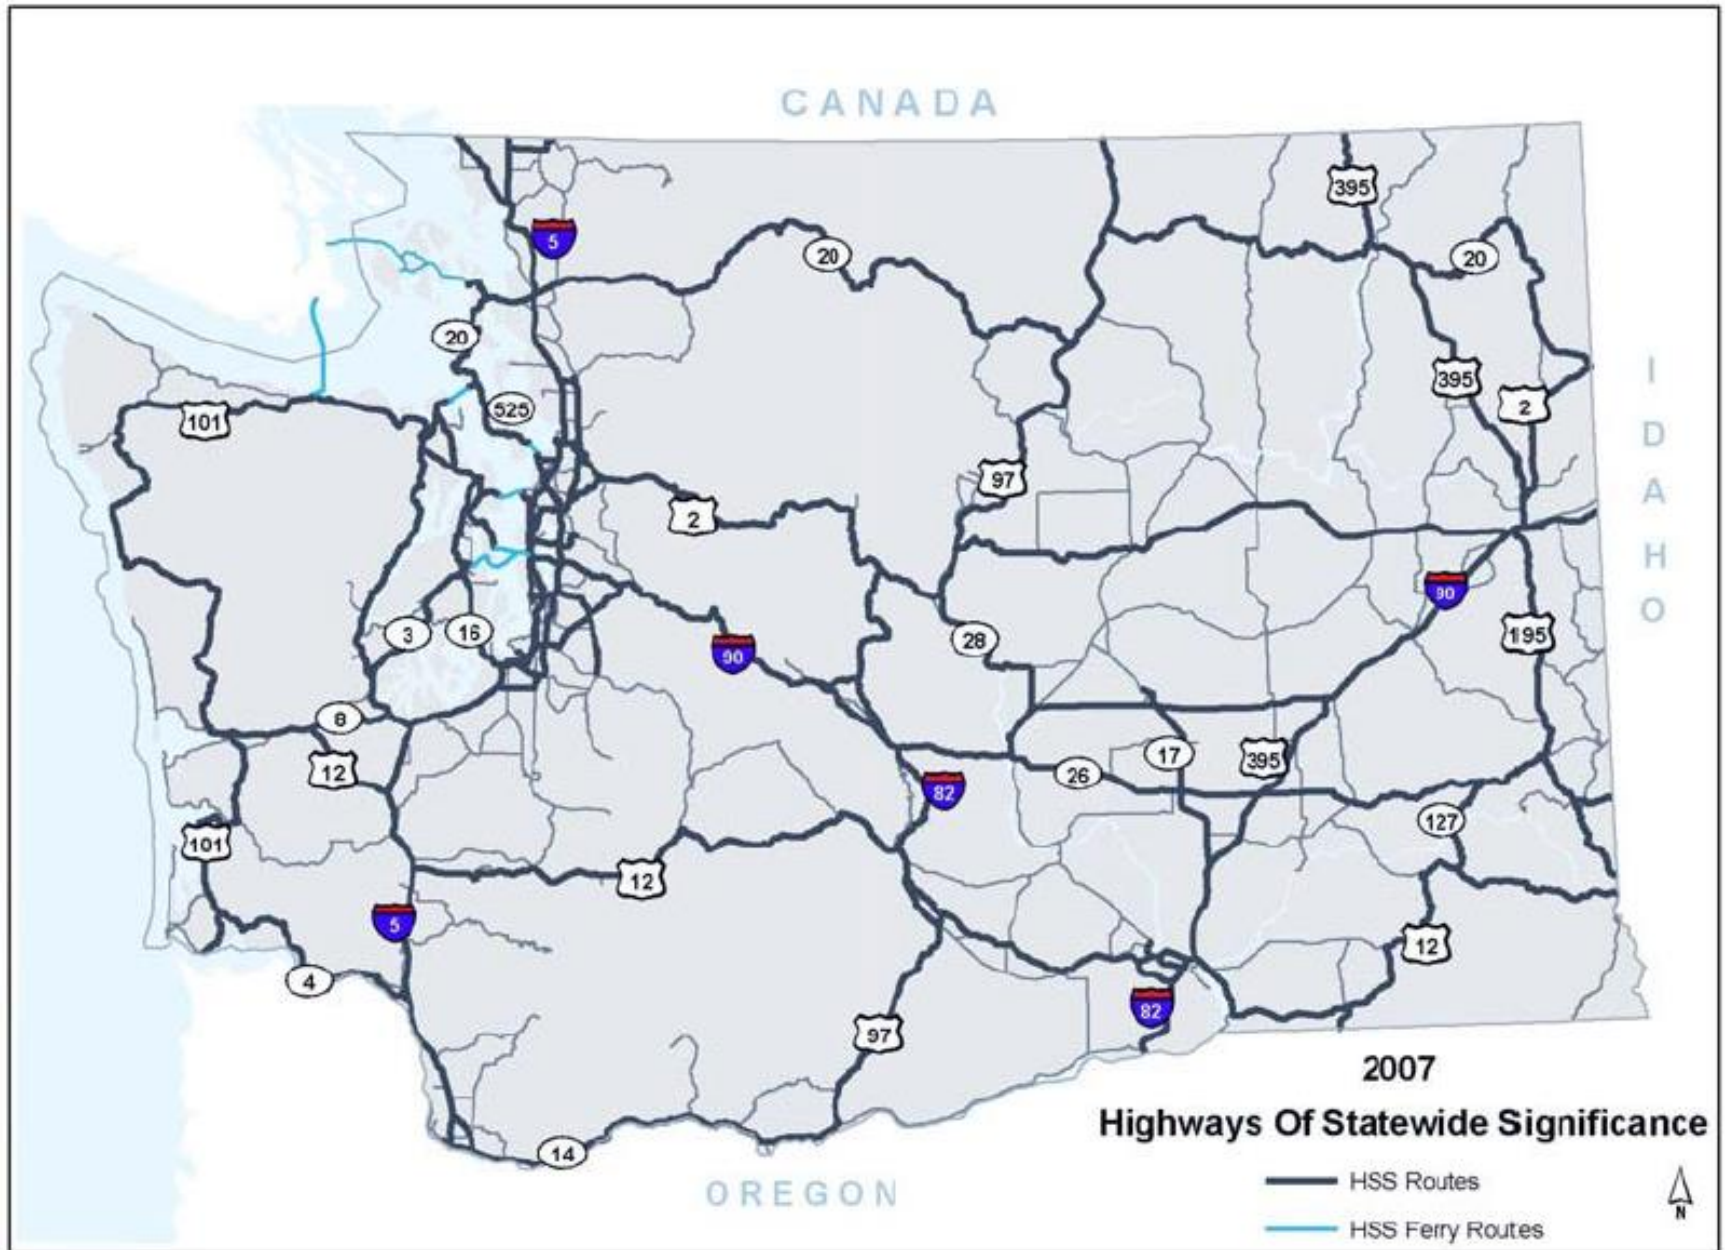

District Information & Office Locations:

WSFC in its larger context

Cross-Sector Information Sharing System

SAR: Suspicious Activity Reports

WSFC's main job is to centrally evaluate "SAR" – Suspicious Activity Reports – from individual agencies statewide, and prepare evaluations of likely threats to known planned events such as presidential visits, conferences, planned protests, etc.

"Suspicious Activity" Defined:

Suspicious activity is observed behavior that may be indicative of intelligence gathering or preoperational planning related to terrorism or other criminal activity.

The focus is on behavior."

This is why photographers get checked out.

Database of SARs circa 2010

From: Donald Sutherland [don.sutherland@ijis.org]

Cc: Ron.Leavell@Seattle.Gov; Matt Bezanson; Clyde Ford; Randy.Drake@wsp.wa.gov
Subject: RE: a few tech questions on FCS and Shared Space integration

Dan

Let me take a crack at most of these questions. Chandra jump in and clarify if necessary or add more input.

1. At the WSFC, the SVT has assumed the role of the legacy system. SARs are entered directly into the SVT using a provided GUI. Within the SVT, the SARs are vetted and certain SARs are flagged by the analysts for uploading to the NSI Shared Space database. This upload process is completed nightly but could be set to any update interval. The source code for the SVT can be provided upon request from the WSFC.
2. The NSI Shared Space database is totally refreshed on a periodic basis – usually nightly. In the case of WSFC, all SARS stored in the SVT that are flagged for the NSI are pushed to a staging area on the Shared Space database server. There an ETL routine is executed that wipes out the existing NSI database, creates a new database and then loads the database from the staging area. This is done so that the SARs stored in the Shared Space replicate those same SARs in the legacy database (in this case the SVT). If changes were made to SARs in the SVT, those changes would be reflected in the NSI after the next refresh cycle. The decision on the “smash and replace” or as some sites say “flush and fill”, was made to eliminate the risk of the legacy and NSI databases getting out of sync if add, update and delete options were made. This keeps things simple and the only weakness is a temporary NSI database latency. It’s also important to note that we are not talking about a lot of SARs here. Most FCs today have less than 100 SARs in their NSI DB.
3. We do not provide a fixed schema for the extract format and leave that up to the agency. We can work with your team to discuss the various options here.
4. Most of the sites today provide an XML document or file containing the SARs records to be processed by the ETL. As part of each site’s deployment we go thru a mapping drill to understand the inbound data and data values and then build the ETL to match the input. In some cases we have set up a staging database where the legacy system would in fact perform a replication from the source to the staging area. Then the ETL performs as before.
5. Right now, access to the NSI Shared Spaces (collectively) is only permitted from the NCIRC portal via a secure VPN.
6. Not at this time. The ETL performs other activities such populating audit logs and transaction counts that can be accessed by the NCIRC site. While this could be handled by the legacy system, we prefer to maintain control over this function at the NSI DB level.

Don

Hiding Fusion Reports online

From: Tietje, Grant [<mailto:Grant.Tietje@seattle.gov>]
Sent: Tuesday, November 09, 2010 08:38 AM
To: Drake, Randy (WSP)
Cc: Sheppard, Mark <Mark.Sheppard@seattle.gov>
Subject: Intelligence Reports

Randy,
Mark and I would like to suggest a change in how you distribute Intelligence Reports from the Fusion Center.

The regional SharePoint has the capability to automatically take reports you email and post them to a folder in SharePoint. This provides a way to store documents in one location accessible by all. Also, each individual authorized to read documents in the folder can configure SharePoint to notify them by email when a document has been posted.

If you are interested Mark Sheppard is willing to discuss the details.

Grant Tietje
Planning Coordinator
Seattle Police Department
Office of Emergency Management
105 5th Ave. South, Suite 300
Seattle, WA 98104
Work: 206-684-7722

This method of placing distributed intelligence products only onto a shared internet space keeps them off of the local email systems, which has implications for open records act requests for public records emails. Generally, it fails to allow these reports to be distributed to outside auditors who ask for these files even years later.

Not all of WSFC are WSP positions

Overlap with US Military - analysts

3.1.3 – Kia Graham

Background: Kia Graham is a professional intelligence analyst with over five years of military intelligence experience encompassing regional fusion analyses including support to wartime operations in Iraq as well as direct analytical support to over 100 strategic interrogations of high-value human intelligence targets as a senior intelligence analyst with Joint Task Force Guantanamo Bay-Cuba. She has progressive experience in intelligence positions ranging from a supervisor of human intelligence collection operations to lead intelligence analyst in a fusion analysis section. She assisted in the creation and facilitation of an Intelligence Information Upload Project with US Southern Command. This effort proved critical to the management and archive storage of all information related to detainees at Guantanamo Bay-Cuba. She possesses comprehensive knowledge of Defense Department and Intelligence Community organizations, missions and functions. Her experience has proven invaluable in providing her with context in understanding and working with the inter-relationship maze associated with national and Defense Department intelligence agencies.

Kia Graham

Summary:

- **Formal education:** slated to complete BA in Intelligence Studies with a focus on Terrorism in summer 2009; currently maintaining 4.0 GPA
- **National security work experience:** over five years in intelligence with positions in tactical and national level organizations including as an intelligence analyst supporting US Special Operations in Iraq in 2004-2005; experience as lead intelligence liaison with federal law enforcement agencies, major military commands, international committees, and other government agencies
- **Specialized intelligence analysis training:** graduate of US Army Counter-Intelligence Special Agent course and Joint Interrogation certification course; completed US Army Intelligence Support in Counter-Terrorism course and US Army basic intelligence analyst course
- **Microsoft Office software proficiency:** over five years daily proficiency in substance, organization, style and correctness in all forms of written communication developed through Microsoft Office suite applications

Analysts often come from US Military Intelligence practices and training

3.1.4 – Kathleena Almquist

Background: Kathleena Almquist is an intelligence analyst with over four years of US Army military intelligence experience and training; with fifteen months operational experience in support of Operation Iraqi Freedom as a member of Third Stryker Brigade Second Infantry Division's brigade level intelligence team based out of Fort Lewis, Washington. She will graduate with high honors and receive an Associate in Arts and Sciences degree next month, with concentrations in writing intensive and multicultural investigative courses. She has received military training from the Department of Defense in intelligence analysis and mobile warning analysis. She has completed programs in security management and is a graduate of the US Army Counter-Intelligence course.

Kathleena Almquist

Summary:

- **Formal education:** AAS – Dec 2008 (elements of Asian Language and Culture, intensive writing, and mathematical reasoning)
- **National security work experience:** over four years in US Army Intelligence
- **Specialized intelligence analysis training:** completed intelligence training such as the Mobile Warning Analysis Course from the Joint Military Intelligence Training Center and US Army Counter-Intelligence course
- **Microsoft Office software proficiency:** over four years daily proficiency in substance, organization, style and correctness in all forms of written communication developed through Microsoft Office suite applications

Lead Analyst at WSFC:

3.2.1 – Bill Evans

Our intelligence analyst-lead service is a strong and visionary leader. Our approach is to have our senior intelligence analyst lead by doing, coaching, teaching and mentoring. He has a proven track record for transformational leadership—motivating a team to be efficient and effective in an emerging and challenging environment.

Background: Bill Evans is a professional senior intelligence analyst and intelligence supervisor with over twenty years of US Army military intelligence experience and training; with over four years as a counter-intelligence specialist overseas and in support of First Corps' intelligence staff at Fort Lewis, Washington. He possesses a BA in Political Science and is a Distinguished Graduate of the US Army's Basic Intelligence, Counter-Intelligence, and Advanced Intelligence Analysis and Operations courses. He has received advanced military training as a strategic counter-intelligence officer and is a graduate of several Department of Defense strategic operations and plans courses. He has completed extensive special training programs in security management, interviewing and interrogation, terrorism and counter-terrorism. At Fort Lewis, he supervised a large group of intelligence analysts handling a myriad of complex issues and provided expert input to First Corps' intelligence program management and policy decisions. He planned and directed intelligence analytical activities to support First Corps' mission and work priorities. He determined goals and objectives; prepared short and long-range work plans and schedules. He assisted the First Corps' senior intelligence staff officer and military brigade commander by identifying, prioritizing and establishing deadlines of work to be completed by subordinate intelligence analysts. He provided direction and guidance to analysts in resolving issues and other problems encountered during assigned projects. He reviewed intelligence reports, daily briefs and periodic assessments for relevance, significance, validity and potential applications to countering terrorism acts and organized crimes against Fort Lewis, First Corps and Defense Department jurisdictions, critical infrastructure, services and the Army community at large. In this capacity, he supported the Army's chain of command in developing First Corps' intelligence policies and procedures to accomplish necessary improvements for enhancing routine or highly specialized intelligence work performance requirements.

Our intelligence analyst-lead service is a strong and visionary leader. Our approach is to have our senior intelligence analyst lead by doing, coaching, teaching and mentoring. He has a proven track record for transformational leadership—motivating a team to be efficient and effective in an emerging and challenging environment.

Background: Over 29 years of management experience with demonstrated proficiency in administration, training, investigations, research and analysis, organizational management, and human resources. He has over five years' experience as the Lead Intelligence Analyst with the Washington State Fusion Center. Mr. Evans has maintained a Department of Defense Top Secret (with SCI access) security clearance since 1989; periodic re-investigation completed and clearance level re-validated in January 2013. He is a Department of Defense trained Intelligence Operations/Research and Analysis Officer; certified and credentialed US Army Counter-Intelligence Special Agent.

William Evans

Lead Intelligence Analyst, Washington State Fusion Center (WSFC), Seattle, WA
12/2008 – Present

Lead a six-person analytical team responsible for the performing the Fusion Center's four Core Operational Capabilities: (1) Receive, (2) Analyze, (3) Gather and (4) Disseminate, and supporting the four Enabling Capabilities: (1) Privacy, Civil Rights and Civil Liberties (P/CRCL), (2) Sustainment Strategy, (3) Communications and Outreach and (4) Security.

Battalion Commander [Lieutenant Colonel (LTC), Military Intelligence (MI)], 373rd Military Intelligence Battalion (US Army Reserve), Tumwater, WA, 8/07 – Present

Bill Evans commands a Reserve Component Military Intelligence Battalion. He is responsible for providing combat-ready multi-discipline intelligence collection and counterintelligence support for operational and tactical military operations. He is responsible for mission execution, training, personnel and logistics readiness of four subordinate companies; ensures soldiers and units are maintained at a high state of readiness and prepared for world-wide deployments in support of the nation's effort to fight terrorism. He also coordinates specialized mission-related training opportunities for intelligence personnel to increase their understanding of intelligence operations, processes and systems. Ultimately, he is responsible for the morale, welfare, and professional development of all assigned and attached soldiers. He maintains liaison with active component and reserve component Army organizations, and joint and national intelligence agencies. Further, he develops and maintains community-based relations programs.

Operational Associates History

Operational Applications Incorporated has successfully provided criminal intelligence analytical services from July 2006 to September 2008 under a WSP task order generated by RFQQ No. C060226PSC. Doug Larm performed as the intelligence analyst with the Seattle Police Department under provisions of this state contract.

Further, under a WSP task order generated by RFQQ No. C090551PSC, Operational Applications Incorporated provided criminal intelligence analytical services from January 2009 to December 2012. Kia Graham performed as a criminal intelligence analyst with the WSFC under provisions of this state contract. Under a WSP task order generated by RFQQ No. C110169PSC, Operational Applications Incorporated provided criminal intelligence analytical services from October 2010 to January 2014. Robert Hollander performed as a criminal intelligence analyst with the WSFC under provisions of this state contract. Under a WSP task order generated by RFQQ No. C110008PSC, Operational Applications Incorporated provided criminal intelligence analytical services from July 2010 to November 2011. Stephanie Reich performed as a criminal intelligence analyst with the WSFC under provisions of this state contract.

Additionally, Operational Applications Incorporated is currently providing criminal intelligence analytical services to the WSFC under two standing WSP task orders: C090433PSC and C140423PSC. Bill Evans is performing as a lead intelligence analyst and Kia Graham is performing as a criminal intelligence analyst with the WSFC under provisions of these state contracts.

Most WSFC are Fusion Liaison Officers

Administrative Notes

- As FLOs, you will be nominated and validated for access to the Homeland Security Information Network (HSIN). Some of you have already accessed HSIN, while some of you may be going through the process to gain access to HSIN – remember, “Patience is a Virtue!” If you are having any difficulty accessing HSIN, please notify the WSFC webmaster at **webmaster@wsfc.wa.gov**.
- When you submit a Suspicious Activity Report (SAR), or Tip and Lead (T/L) to the WSFC Intake (**intake@wsfc.wa.gov**), please identify yourself as a FLO in the subject line.
- We value your feedback, and want to hear from you. Whether it be with respect to online courses we suggest, recommendations for training in the future, or the contents of the *FLO Newsletter*, your input is important as we continue to strive to improve the FLO program. Send your feedback to: **flo@wsfc.wa.gov**.

Fusion Liaison Officers

- The Fusion Liaison Officer (FLO) program is the development and coordination of a statewide network of representatives from local, regional, or tribal law enforcement, fire service, emergency management, and critical infrastructure Sectors. The FLO program serves as an integral component of the **Statewide Integrated Intelligence System (SIIS)** and provides the mechanism to gather and analyze information, and share actionable intelligence.
- The network of trained and certified FLOs ensures that vital disciplines are incorporated into the fusion process by serving as the conduit through which homeland security and crime related information flows to the WSFC, Regional Intelligence Groups (RIGs), and/or local law enforcement for assessment, analysis, and follow-up.
- - SOURCE: Puget Sound Regional Catastrophic Disaster Coordination Plan, October 2012

FLO Program is DHS Money

Background. The FLO/TLO training will be funded by the U.S. Department of Homeland Security (DHS) Homeland Security Grant Program (HSGP), which provides funding to each state for homeland security planning, organization, equipment, training, and exercise activities.

The WSFC adopted a FLO program in December 2010. The WSFC seeks to sustain its FLO program with the continued delivery of FLO training, consisting of both the FLO Basic Courses for new FLOs; maintaining the current cadre of existing FLO's through FLO Intermediate training; and other complementary training offerings. The FLO program provides two way communications for law enforcement, fire, emergency management, critical infrastructure (CI), and other stakeholders to share suspicious activity information or tips/lead to the WSFC and for the WSFC to share information with partners/stakeholders to improve situational awareness.

Training will take place within the Washington State area. Location may vary, and date can be changed upon mutual concurrence. Hal Kempfer and Frank Stopa are the Subject Matter Experts (SME) instructors/coordinators ("contractors") involved with this training and training support. KIPP may employ another qualified and certified FLO/TLO instructor as a back-up if necessary and in consensus with WSFC at the same applicable rate as the primary instructor. This Fusion Liaison Officer/Terrorism Liaison Officer (FLO/TLO) Basic Course and the Fusion Liaison Officer/Terrorism Liaison Officer (FLO/TLO) Intermediate Course are anticipated to have a maximum of 50 students/participants per class.

FLO Coordinators (Feb2012)

FLO Trainers are former CIA, Marines

Frank Stopa has provided his clients in over 120 federal, state, local and international agencies and departments cutting edge human intelligence consulting and training in the areas of competitive intelligence and counter terrorism. A published author of two books, *Human Skills* and *The Brotherhood*, Frank is an accomplished writer of literary works and intelligence wargames focused on counterterrorism. Mr. Stopa is a former operations officer and operations manager in the Central Intelligence Agency's Clandestine Service. He was twice nominated for the U.S. National Human Intelligence Collector of the Year. He has lived and traveled extensively in the Middle East, Europe, Asia and the former Soviet Republics. Frank has not only unparalleled counterterrorism intelligence experience, but has taught in this area for all manner of government and private sector officials in the U.S. and abroad. He is considered one of the very best instructors in this topic nationally, and has co-developed and fielded such notable courses as the Terrorism Intelligence Analysis (TIA) and Terrorism Liaison Officer (TLO) Courses.

Hal Kempfer is the CEO and Founder of KIPP, Knowledge and Intelligence Program Professionals Inc.

Hal Kempfer is the CEO and Founder of KIPP, Knowledge and Intelligence Program Professionals Inc. in Long Beach, California. Hal is a senior instructor and course developer for the Terrorism Liaison Officer courses, Infrastructure Liaison Officer (InfraGard) course, Al Qaeda Doctrine (AQD) seminar, Human Skills workshop, Pre-Incident Indicator Workshop, and a variety of other courses, workshops, seminars and Homeland Security exercises. Widely held as a seasoned instructor in areas of homeland security, terrorism and intelligence, Hal and his firm have supported such notable organizations as the Naval Postgraduate School, U.S. Pacific Command's Joint Task Force Homeland Defense, the National Guard's National Interagency Civil-Military Institute and California Specialized Training Institute. He has been involved in terrorism issues in the military and civilian sectors for almost a quarter century. A military veteran of Operation's Enduring Freedom, Iraqi Freedom, Cuba-Haiti Crisis of '94, Desert Shield/Storm, the Cold War and the "War on Drugs," he is a retired Marine Reserve Lt Colonel with multiple tours involving multi-jurisdictional and interagency intelligence operations and support, particularly tied to threats posed by transnational networked organizations like modern terrorists. A former Director of Intelligence (G/J-2) for the 1st Marine Expeditionary Brigade and CENTCOM's Combined/Joint Task Force Consequence Management, he was also a former Director of a joint/interagency fusion center (the JRIC) at Camp Pendleton, California, and former senior analyst, regional coordinator/executive officer for military intelligence support to the Los Angeles High Intensity Drug Trafficking Area (HIDTA). Hal is a featured expert on ABC 7 television news and 89.3 FM National Public Radio on military affairs, intelligence and terrorism,

FLO Training Sessions 50 ppl each

The above-referenced Contract between the Washington State Patrol and the Knowledge and Intelligence Program Professionals is hereby amended as follows:

- a. The period of performance of this Agreement shall be extended to remain in effect until September 30, 2016, unless terminated sooner as provided in the Agreement.
- b. The rates remain the same; fixed fee per training site according to the Cost per Site shown below and as outlined in the Contractor's proposal. Maximum contract amount is increased by \$44,600, revising the total from \$89,200 to \$133,800.

April 18 FLO Basic = \$3600
April 19 FLO Basic = \$3600
April 20 FLO Basic = \$3600
April 21 – 22 FLO Intermediate = \$11,500

200 April Students

September 26 FLO Basic = \$3600
September 27 FLO Basic = \$3600
September 28 FLO Basic = \$3600
September 29-30 FLO Intermediate = \$11,500
Total = \$44,600

200 September Students

Training will take place within the Washington State area. Location may vary, and date can be changed upon mutual concurrence. Hal Kempfer and Frank Stopa are the Subject Matter Experts (SME) instructors/coordinators (“contractors”) involved with this training and training support. KIPP may employ another qualified and certified FLO/TLO instructor as a back-up if necessary and in consensus with WSFC at the same applicable rate as the primary instructor. This Fusion Liaison Officer/Terrorism Liaison Officer (FLO/TLO) Basic Course and the Fusion Liaison Officer/Terrorism Liaison Officer (FLO/TLO) Intermediate Course are anticipated to have a maximum of 50 students/participants per class.

Subject: Puget Sound Anarchists upcoming events -- Seattle and Olympia

I HAVE FOUND SOME VERY INTERESTING UPCOMING EVENTS ON THE WEBSITE LISTED AT THE BOTTOM OF THE PAGE. I HAVE INCLUDED A SEATTLE PD, A KING COUNTY METRO CONTACT AS WELL AS A WASHINGTON STATE PATROL CONTACT – JAMES IS THE LT IN CHARGE OF THE CAPITOL CAMPUS IN OLYMPIA. BRAD CAN YOUR TEAM DRILL DOWN ON SOME OF THESE EVENTS – I AM SPECIFICALLY CONCERNED ABOUT THE TWO EVENTS ON FRIDAY 3/15/13 AND THE ONE IN OLYMPIA -- WE HAVE 20+ ASSETS CLOSE TO ALL OF THESE EVENTS.

International Day Against Police Brutality

194 reads

Event Date:

Friday, March 15, 2013 - 3:00pm

On Friday, March 15th, we will be rallying and marching in protest against the police in Seattle, WA. The schedule is as follows...

Subject: Sharing of Intel on Anarchists

Hello Darren,

I received your name, title and email from a receptionist at the main number for Olympia PD.

My name is Kim Triplett Kolerich (I have attached my Bank of America/WSP resume below) so you will know that I am who I say I am!

The bank is quite concerned about the May Day events and Anarchists in the Pacific NW.

I recently attended some training sponsored by the Oregon Fusion Center on Domestic Terrorists and was told that your city Chief was an expert on them – don't think I need to go that high to get some help getting well ahead of any info/tactics that you have intel on relating to the Anarchists upcoming events.

If you could call me or email me that would be great – I am well aware of Public Disclosure issues so if you would rather meet in person I am more than willing to meet in Olympia and meet at your office or over coffee.

Please let me know how we can share info and work together on being the most prepared as we can.

Bank of America's FLO (cont)

Kim Triplett Kolerich joins the team after spending 25 years in the Washington State Patrol (WSP). She recently retired at the rank of Sergeant, leading a 10-member unit of line troopers in the busiest area of King County. In her career Kim also served the WSP as a fraud detective, auto theft detective, technical collision investigator, field training officer and line trooper. In her ten years as a fraud detective Kim was a founding member of a federal social security disability fraud taskforce unit based in Seattle. The taskforce's complex investigations netted on average \$1 million per month in fraudulent claims and lost federal funds, and won numerous national awards. Kim also lead an undercover unit that focused on out-of-state license fraud, resulting in the recovery of millions of dollars of state revenue. As an auto theft detective Kim lead undercover operations netting hundreds of thousands of dollars in recoveries. She was the lead detective on a case that led to the felon receiving the longest state sentence ever for RICO violations, for this she received a national honor for her work - Investigator of the Year. Kim has also been honored with the Governor's Lifesaving Award for heroic actions in saving the lives of five motorists, and a King County Lifesaving Award for helping save the lives of three police detectives gunned down in a shooting spree. Kim has extensive training in executive protection, open sources, financial fraud and criminal statistics. She is a subject matter expert and sought-after speaker on identity theft, complex fraud investigations and policing leadership. She is a graduate of Central Washington University with a degree in Criminal Justice. Kim will sit in Seattle and have analytical responsibilities over the Protective Services West Region, specifically focusing on operational intelligence. She will also act within an Executive Protection capacity, serving as the Seattle Market Manager.

B of A Social Media Trolls

Subject: RE: Anarchists marching 11/5/13 in Olympia

Hello Brian,

I wanted to introduce myself to you – Welcome to the wonderful rank of Sgt. –

I retired 10/11/12 (how cute is that Jason!!) that way I will always remember it!

I was a D2 Sgt for 6 years and retired with 25+ years of service – Jason's dad, Brian, was my classmate.

I am not the Operational Criminal Intel Analyst for Bank of America for the 14 western states and also am the NW Executive Protection Market Manager.

From time to time I will see items that I believe will be of use to my friends at WSP – especially during session. May Day I will pick your brain for intel and I will give you a lot also – the Public-Private Partnership worked great last year and hopefully being ahead of the Anarchists will protect all of you from protests/arrests/injury.

If you find any intel on Anarchists or Occupy Protesters please let me know – I will most likely find it first as Social Media trolling is not what the WSP does best – Bank of America has a team of 20 people and that's all they do all day and then pass it to us around the country!!

HSIN for Sharing SARs from FLOs

- The HSIN platform is SharePoint based, designed for collaboration. While these COI's are the primary mechanism for the WSFC to share information, their real strength comes as all members contribute information, best practices, and lessons learned with community members.. *We strongly encourage all of our partners to take the time to share relevant information by posting to these COI's.* With strong emphasis on two-way sharing, this platform can significantly help everyone in their mission and protect lives and property in Washington State.
- In addition to sharing information with partners across disciplines, critical sectors, and the State of Washington, members may also request access to other COI's from around the nation and gain access to additional tools which facilitate information sharing. These additional tools are provided free of charge and can be used by all members.
- One of the primary tools is HSIN Connect. HSIN Connect is based on Adobe connect and is a Web based conferencing solution to host web meetings. These meetings can be accessed by non-HSIN members as well as members. The web conference services includes full audio and video streaming as well as the ability to present information such as documents and PowerPoint presentations. The Connect sessions can also be sent to a variety of handheld devices such as Android and iOS phones.

Criminal Intelligence Analyst – Lead Services

Paul J. Wharton

Wharton went to both the police academy in CA and college in AZ for Intelligence Studies. After serving as both a police officer and corrections officer, he served in the United States Army as a Counterintelligence Special Agent. Wharton worked in the private sector as an Armed Senior Counterintelligence Support Specialist and then as an Investigator for the State of Washington.

Douglas King – IT Guy on Loan

Douglas King
235 Broadway
Suite 300
Tacoma, WA 98402
206-499-4687
kingdo@comcast.net

Designed and installed UASI funded video conferencing terminals at Snohomish County's Everett based and King County's Kent RIG locations to link them to the Fusion Center so local analysts could operate from there and participate in the daily morning Stand-up briefings.

1B: I have had no contracts over the last five years as I have been employed at the City of Seattle and on loan to the Washington State Fusion Center under a UASI Support Grant.

2A: I, Douglas King, will be the sole provider of providing the support outlined in this RFQQ for the entire Period of Performance.

From June 2009 to January 2013 (4-years), I worked at the Washington State Fusion Center and provided the following full-time support;

- Fusion Center, Seattle Police, Seattle Fire, and DHS's secret HSDN network support and maintenance including user account administration, network security, firewall administration and configuration, data port activations, adding data connections for additional work stations and Active Directory support and administration.
- Worked directly with FBI staff with the day to day administration of their network presence in the Fusion Center and the day to day operation of the Fusion Center in the FBI HQ building
- Day to day desktop support for over 50 work stations and four network printers for the Fusion Center and Seattle Police and Fire, and the Department of Homeland Security. Provided updates, operating system support, resolving printing problems, cleaned desktops of malware infections, and helping staff with application issues

George Koval / Operational Assoc.

3.1.1 – George Koval

Background: Thirteen years' experience in military law enforcement and criminal investigations. Provided front-line law enforcement, anti-terrorism, public safety, emergency response, critical infrastructure protection, and coordination with other emergency services to include fire service, public health, hazardous material, and emergency medical services. As a criminal investigator, Mr. Koval has extensive experience in a variety of intelligence-type work, which has included monitoring, receiving, analyzing, applying and providing intelligence during planned and active real-time law enforcement operations.

George Koval

Summary:

- **Formal education:** American Military University – Master of Arts in Intelligence Studies/Homeland Security (04/2013 Honors GPA 3.75); University of Washington – Bachelors of Arts in Community Psychology (11/2011 GPA 3.4)
- **National security work experience:** Criminal investigator/detective for Naval Criminal Investigative Service Burglary Task Force and Drug Suppression Operation Team while assigned to Naples, Italy
- **Specialized intelligence analysis training:** Honors graduate American Military University Master of Arts in Intelligence Studies/Homeland Security and completed threat analysis, analytics II, strategic intelligence collection, and trend analysis
- **Microsoft Office software proficiency:** over thirteen years daily proficiency in substance, organization, style and correctness in all forms of written communication developed through Microsoft Office suite applications

Dennis Ross / Operational Assoc.

3.1.2 – Dennis Ross

Background: Twenty six years' experience as an all-source Intelligence Analyst specializing in network analysis of Terrorist Organizations and Middle Eastern Weapons of Mass Destruction (WMD) Programs. Provided critical intelligence support to combat, law enforcement and intelligence operations within a regional area fusion center and within Department of Homeland Security (DHS) Office of Intelligence and Analysis (I&A) Homegrown Violent Extremism Branch monitoring homeland and overseas threat streams. Tracked and participated in numerous investigations of potential homegrown terrorists; three of which resulted in arrests. Mr. Ross' network analysis and collaboration skills were important and effective as an intelligence analyst responsible for sharing information between FBI, CIA, NSA, DIA and state and local law enforcement officials. His analytical and writing skills were again on display when he was chosen to participate in a multi-agency effort to provide state and local Fusion Centers with better methods to identify, deter and disrupt homegrown violent radicalization. This effort included both al-Qaida inspired Islamic extremism as well as domestic extremism - such as criminal extremists espousing white supremacy, criminal elements identifying as Sovereign Citizens and FBI-designated eco-terrorists. He authored two case studies documenting the development – from initial radicalization to fully functional terrorist operative – of two identified US citizens involved in recent high profile terrorist acts. As a result of his professionalism, expertise and demonstrable briefing skills, Mr. Ross was selected to be part of a team that provided DHS's Undersecretary for Intelligence Analysis and her senior staff with daily, personal updates of ongoing terror threats to the Homeland.

Dennis Ross

Senior Intelligence Analyst, Washington Regional Threat Analysis Center, Counterterrorism Team Lead, ManTech International Corporation, April 2012-February 2013

Senior Intelligence Analyst, Department of Homeland Security's (DHS) Office for Intelligence and Analysis, Homegrown Violent Extremism Branch, Booz Allen Hamilton October 2005-April 2012

All proposals received shall remain confidential until the contract, if any, resulting from this RFQQ is signed by the Chief of the Washington State Patrol and the apparent successful Contractor; thereafter, the proposals shall be deemed public records as defined in RCW 42.56.

Any information in the proposal that the Consultant desires to claim as proprietary and exempt from disclosure under the provisions of RCW 42.56 must be clearly designated. The page must be identified and the particular exception from disclosure upon which the Consultant is making the claim. Each page claimed to be exempt from disclosure must be clearly identified by the word "Confidential" printed on the lower right hand corner of the page.

WSP will consider a Consultant's request for exemption from disclosure; however, WSP will make a decision predicated upon Chapter 42.56 RCW and Chapter 143-06 of the Washington Administrative Code. Marking the entire proposal exempt from disclosure will not be honored. The Consultant must be reasonable in designating information as confidential. If any information is marked as proprietary in the proposal, such information will not be made available until the affected proposer has been given an opportunity to seek a court injunction against the requested disclosure.

A charge will be made for copying and shipping, as outlined in RCW 42.56.120. No fee shall be charged for inspection of contract files, but twenty-four (24) hours' notice to the RFQQ Coordinator is required. All requests for information should be directed to the RFQQ Coordinator.

Regional Intelligence Groups

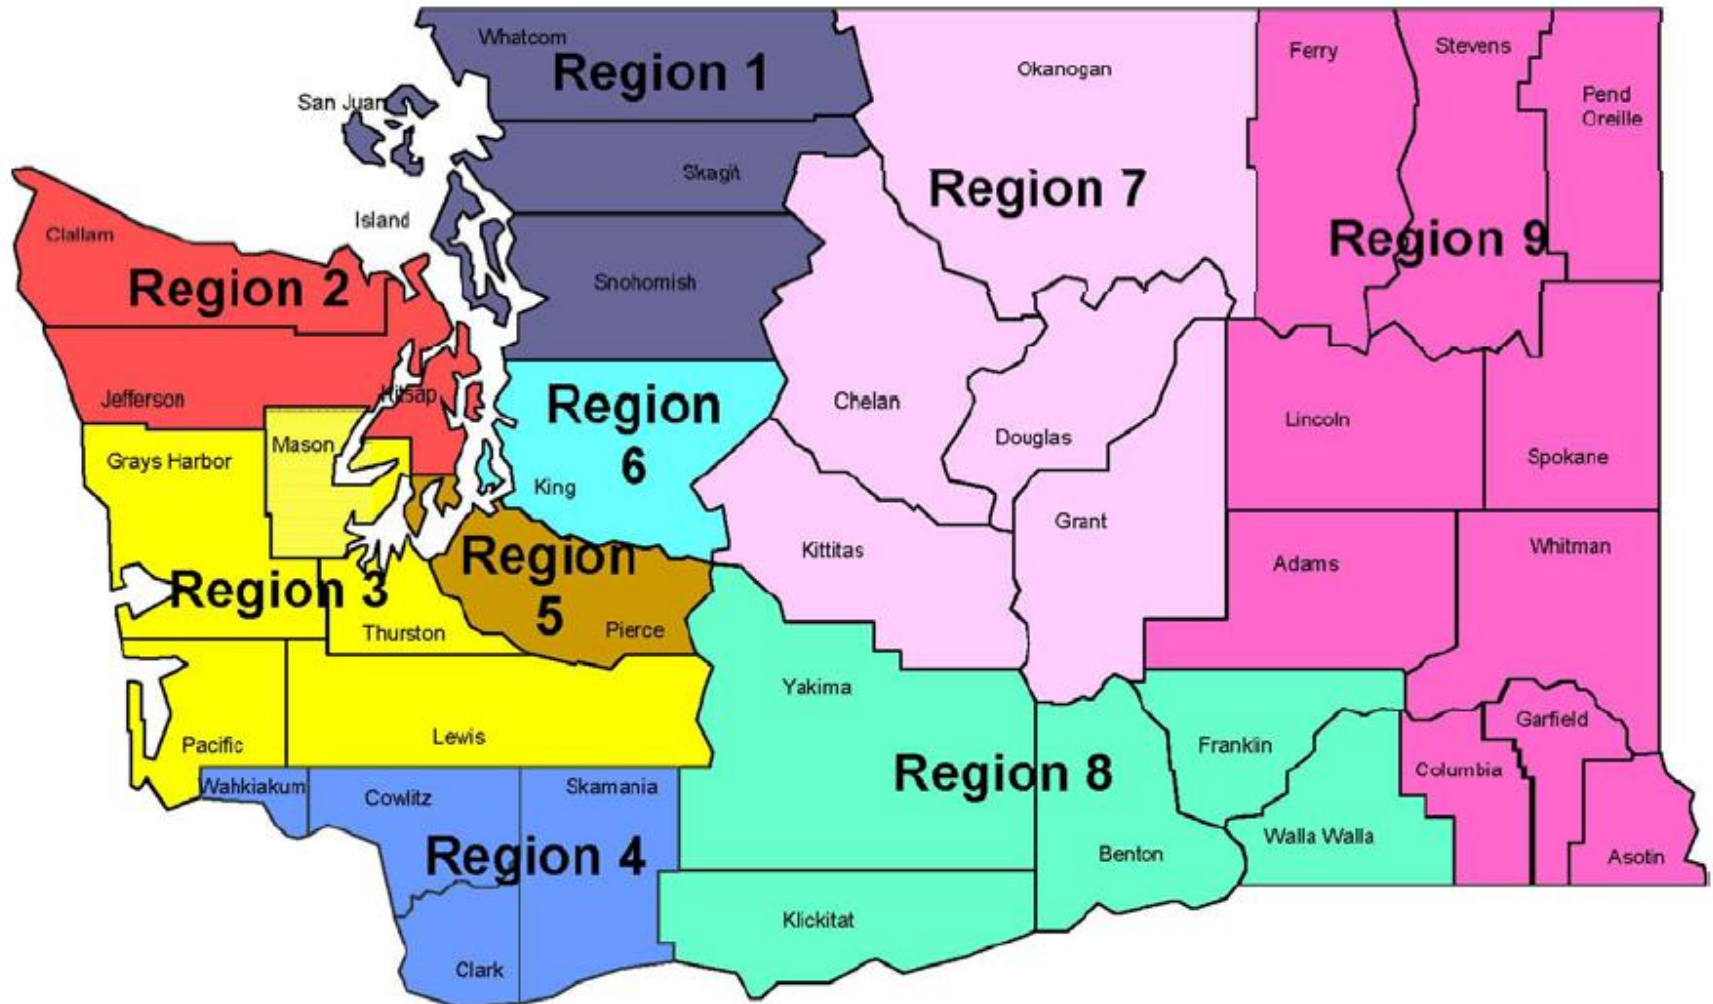

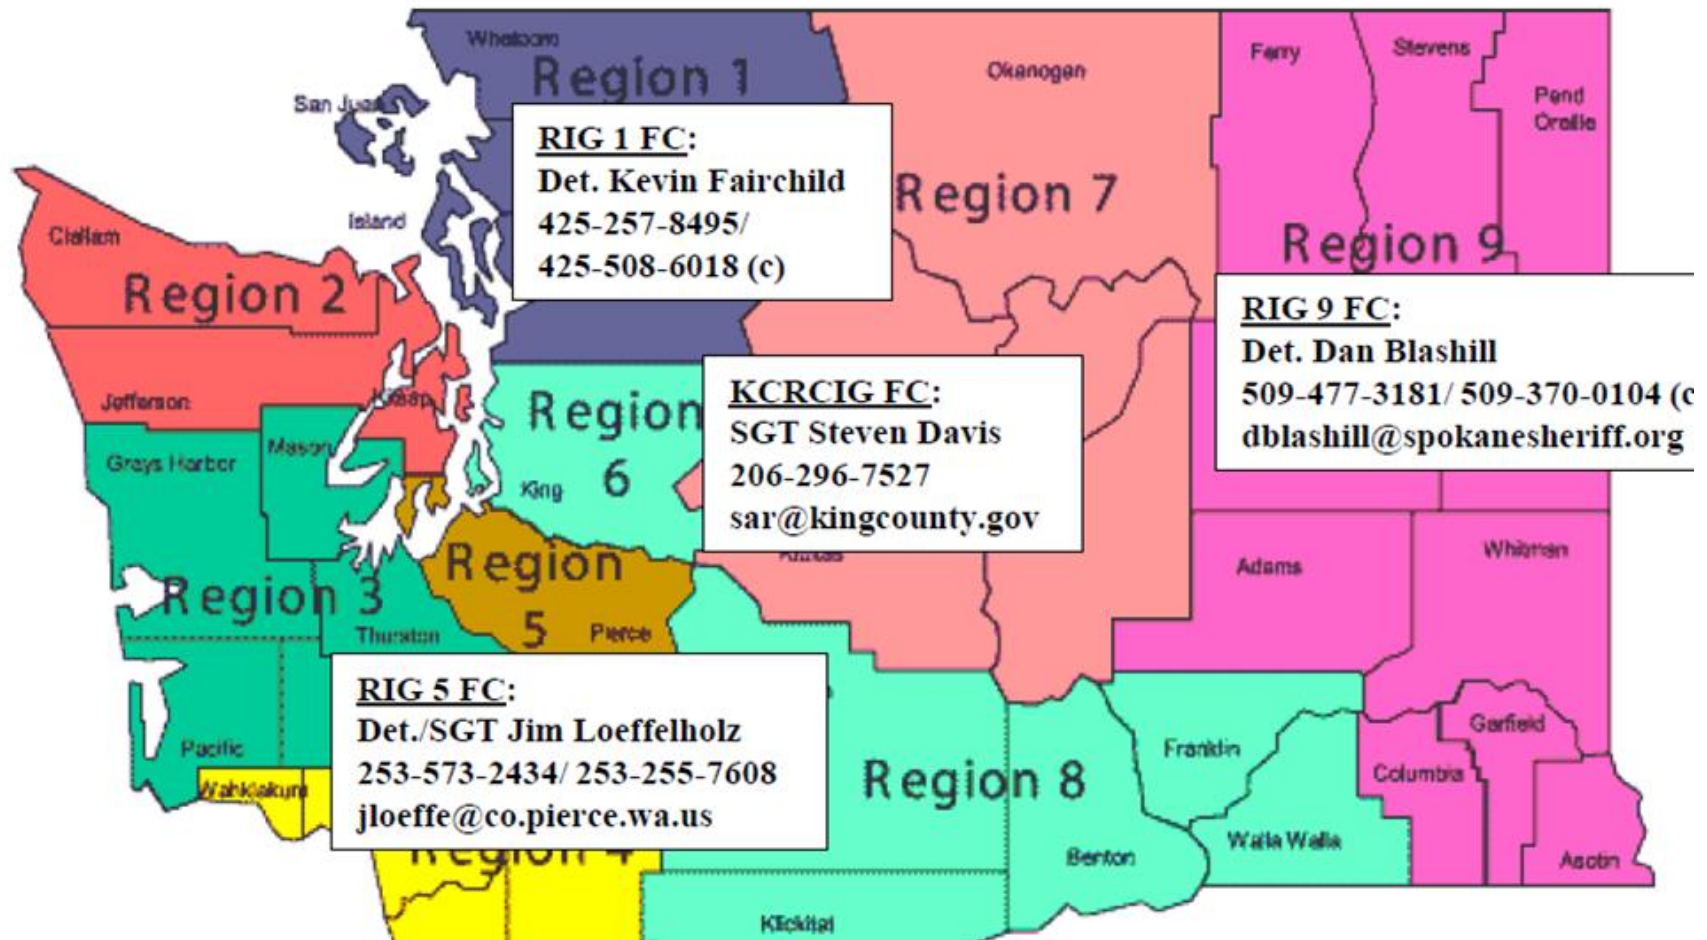

Figure 7 Regional Homeland Security Coordination Districts (RHSCD)24

RIG functions vary by area

- **Regional Intelligence Groups (RIGs)**
- Regional Intelligence Groups (RIGs) maximize the effectiveness of the SIIS by establishing regional collaboration. Figure 3 provides a map of the Homeland Security Regions of Washington State. RIGs are active in Regions 1, 5, 6, and 9 and each one operates according to policies and procedures established by themselves utilizing guidelines established by the Statewide Integrated Intelligence System (SIIS) Plan.
- The composition of each RIG may vary depending on the communities they serve as do their organizational structures. They all share the responsibility of receiving and distributing critical information in a timely manner not only within their regional footprint but also with the Fusion Center.

RIG5 discusses infiltrators of SDS

From: [Chris Adamson](#)
To: [Larry Minturn](#)
Subject: Fwd: Re: A
Date: Tuesday, April 22, 2008 1:34:35 PM

Larry,

I totally agree with Dave. On most operations or specific operations that should always be the case. This particular event or as an example the SDS Conference at UPS last year, we made the decision that their was little or no safety risk to the individual officer. We felt trying to insert two officers would lead to a greater risk of discovery/detection then a single officer. We have tried to reduce the threat rather then increase it. Also, profile for these events also make it hard to find two that would be readily accepted. I also had previous information on another event where they thought some one was a cop and they only took down the plate. They did not approach the individual. This was a large event openly advocating public involvement at a public venue. It was not a small group or closed/clandestine meeting at a secure house or meeting place. Kris was also given orders not to leave the event to attend any such meeting. To avoid that threat.

We have had a lot of contact with these guys. They are not prone to violence at anything other then planned events such as demonstrations. Things are changing, but direct confrontation will not be there strong suit anytime soon.

However, Dave's point is well taken. Kris was going to stop in at the Pitch Pipe on Thursday, as they are having social gatherings all week leading up to the march on the Immigration Center on Sat. Again, a public event but a much smaller group of people in a smaller venue. I apologize for my sloppiness in the planning for his attendance at that event. I will act as his cover or Dave if he is willing may arrange for it if he has manpower available. I will call Dave to coordinate that.

I am open to all suggestions and always looking for improvement.

Chris

Brian Kim
Tacoma Police Special Investigations Unit
Tacoma Police SWAT
3701 S. Pine Street, Tacoma, WA 98409
Office: 253-591-5475
Cell: 253-377-8938
Fax: 253-591-5903

Probably not the same person...
the one who's a cop was born in 1979, not 1970. But the one on the right showed up in activist spaces in Olympia and asked key questions snitches would ask.

Cops often run sex offenders as snitches, perhaps because they are easy to control.

This individual has served the sentence imposed on him by the courts and has advised the Thurston County Sheriff's Office that he will be living in the location below. This notification is not intended to increase fear; rather, it is our belief that an informed public is a safer public.

Name: Brian Lee Kim
Age: 43
Sex: Male
Height: 5'4"
Weight: 200 lbs
Hair: Brown
Eyes: Hazel

Level of Offender: III

Residence: 2800 block of Martin Way East

Synopsis: In 2001, Mr. Kim pled guilty in Thurston County Superior Court to one count of Rape in the Second Degree. The conviction stems from Mr. Kim, at age 29, sexually assaulting an unknown, disabled, young adult male.

Emergency Events and Funerals

- When an assassination of a police officer happens, the security cordon around the memorial services become an active zone for the most active political cops who normally cover protests and activist planning.
- The after action reviews from a 2010 event show a serious overlap with several known political detectives and their supervisors including the asshole who ran John Tower and the Tacoma cops who ran the Stingray program.

Seattle grounds police drone program

Mayor Mike McGinn ordered the Seattle Police Department to abandon its plan to use drones after residents and privacy advocates protested.

By [Christine Clarridge](#)
Seattle Times staff reporter

Saying police need to stay focused on "community building," Mayor Mike McGinn has pulled the plug on the department's controversial drone program even before it got off the ground.

In a brief statement Thursday, McGinn said he and police Chief John Diaz agreed that it was time to end the program so the Seattle Police Department "can focus its resources on public safety and the community building work that is the department's priority."

ALAN BERNER / THE SEATTLE TIMES

The Police Department had purchased two 3.5-pound

Seattle handed drones to LAPD

A pair of drones owned by Los Angeles police are currently under lock-and-key by federal authorities until a policy is in place for their use, an LAPD official said Tuesday.

The move to hand them over to the Department of Homeland Security was a response to public perception and strict federal laws on how law enforcement can fly the unmanned aircraft, said LAPD air support division Lt. Phil Smith.

Related story: LAPD's Beck says he'll seek input before using drones
by **Ruben Vives**

The revelation comes just two weeks after the LAPD had to fend off **inaccurate media reports** that it had deployed a drone above the Staples Center when the Kings won the Stanley Cup championship. The aircraft spotted there — brought down and destroyed by fans — apparently belonged to a civilian.

“If we don’t have them in our possession, then how can we take them out and deploy them?” Smith said.

The city received its two drones from Seattle police on May 29. By the next week, the LAPD had handed the boxes over to federal officials for safekeeping until they were ready to be used.

LAPD Drone policy 2014 / 2015

Earlier in the year, President Soboroff stated, “I want to assure all that there has been no decision that UAV’s will be utilized in the City of Los Angeles. There will be no deployment of these vehicles until the Commission completes a thorough review of the proposed policies and protocols. The proposed policies and protocols will be reviewed publicly by the Commission and the public will have opportunities to address the Commission directly with their concerns.”

The City Council’s vote merely codifies the plans that were already in place.

Despite the fears of some protesters and other anti-drone advocates, the LAPD simply cannot operate the two drones until policies are in place as they do not possess the drones. Inspector General Alexander Bustamante stated earlier this year, “The Commission has transferred the two Unmanned Aerial Vehicles into my custody. These two vehicles will be secured in my offices, and I will not release them to anyone, including the LAPD, until and unless the Commission authorizes their release. In the meantime, these two UAV’s will not be used or operated in any manner.”

It is anticipated that the draft policies and protocols prepared by the LAPD will be considered by the Commission at public meetings to take place by the end of the year.

NEWS The Seattle Police Department Disables Its Mesh Network (the New Apparatus Capable of Spying on You)

posted by **BRENDAN KILEY** *and* **MATT FIKSE-VERKERK** *on* TUE, NOV 12, 2013 *at* 7:42 PM

It's reasonable to assume that locally gleaned information will be shared with other organizations, including federal ones. An SPD diagram of the mesh network, for example, shows its information heading to institutions large and small, including the King County Sheriff's Office, the US Coast Guard, and our local fusion center.

Fusion centers, if you're unfamiliar with the term, are information-sharing hubs, defined by the Department of Homeland Security as "focal points" for the "receipt, analysis, gathering, and sharing" of surveillance information.

If federally funded, locally built surveillance systems with little to no oversight can dump their information in a fusion center—think of it as a gun show for surveillance, where agencies freely swap information with little restriction or oversight—that could allow federal agencies such as the FBI and the NSA to do an end-run around any limitations set by Congress or the FISA court.

If that's their strategy in Seattle, Oakland, and elsewhere, it's an ingenious one—instead of maintaining a few high-powered, herculean surveillance agencies designed to digest an immense amount of traffic and political scrutiny, the federal government could sprinkle an entire nation with lots of low-powered surveillance nodes and let them figure out the best way to route the data by talking to each other. By diffusing the way the information flows, they can make it flow more efficiently.

Seattle Emergency Operations Center

STATION 10 - EOC/FAC

About the Station

Fire Station 10 houses an engine company, a ladder unit and an aid unit. Station 10 also houses the Fire Department's primary hazmat unit and the reserve hazmat unit.

Previously, Fire Station 10 was located in Pioneer Square in the liquefaction zone. Aside from the geologic challenges of the site, the historic character of the building limited potential renovations.

About The Project

The Seattle architectural firm Weinstein A|U Architects + Urban Designers LLC designed the new facility with associate architects Ross Drulis Cusenbury of Sonoma, California. In addition to the fire station, the 60,333 square foot complex houses the Fire Alarm Center (FAC) and the Emergency Operations Center (EOC).

Seattle EOC used for Protests

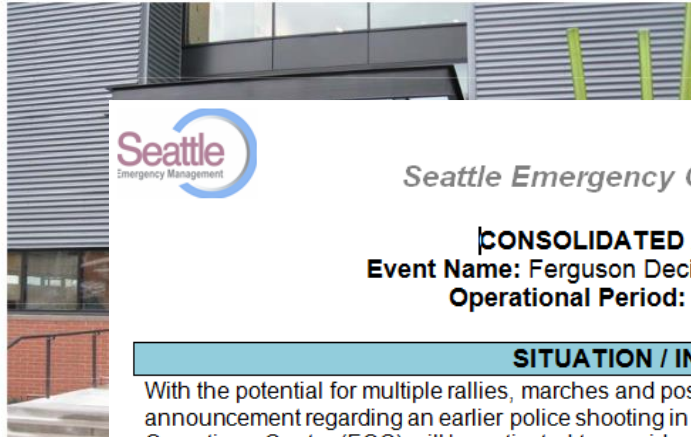

City of Seattle Emergency Operations Center

Project Overview

Total Complex: 60,333 square feet
EOC: 14,290 s.f.
Fire Station 10: 26,730 s.f.
Fire Alarm Center: 12,520 s.f.
Electrical/Mechanical Support Spaces: 6,793 s.f.
Art Budget: \$425,000
Total Project Cost: \$44.3 million
Architects: Weinstein A|U Architects + Urban Designers
Associate Architect: Ross Drulis Cusenbery (CA)
Contractor: Hoffman Construction Company

Seattle Emergency Operations Center CAP

CONSOLIDATED ACTION PLAN # 001

Event Name: Ferguson Decision **State Mission #:** 14-xxxx

Operational Period: Date, xxxx to xxxx hours

SITUATION / INCIDENT / EVENT

With the potential for multiple rallies, marches and possible civil disturbance associated with a grand jury announcement regarding an earlier police shooting in Ferguson, Missouri, the City of Seattle Emergency Operations Center (EOC) will be activated to provide coordination and support to response operations by the police department and to ensure continuity of essential services throughout the City.

In August, a Ferguson police officer fatally shot an unarmed black man, inciting months of protests, putting Ferguson at the center of a national debate over police and race. The grand jury is reviewing the investigation to determine if it warrants charges against the police officer and is expected to make an announcement by the end of November. Seattle, along with most other police departments, expects the decision, regardless of outcome, will cause the potential for civil unrest nationwide.

City of Seattle Mission

The mission of the Seattle EOC is to minimize the impact of emergencies and disasters on the community through coordinated planning, information-sharing and resource management between all City departments, partnering agencies and the public.

RIG6 is King County RIG – a major unit

The video sharing partners in the boxes to the right show how extensively Seattle Police intended to distribute access to their wireless mesh network. This included allowing the WSFC to control the cameras in the network. The Mesh Network was shut down, in 2013, due to pressure from Seattle Privacy (an advocacy group) but the equipment might be passed to control by another agency sponsor. "Existing Aviation Video" refers to the WSP Cessna microwave downlink discussed elsewhere.

KCRIG Meeting Place

Subject: No RIG Meeting on Thursday, July 3, 2014

Greetings,

We decided that we would cancel the RIG meeting for July 3rd at KCSO for the following reasons:

- Some agencies (particularly SPD) are inundated with 4th of July planning -
- Some RIG meeting attendees that work 4/10 schedules with Fridays off may otherwise take off on Thursday, July 3rd since July 4th is a holiday -
- Other 4th of July events occurring over the three-day weekend may cause adjusted work schedules for some attendees, making them unable to attend -

The next regularly scheduled RIG meeting will be at SPD HQ on Thursday, July 17, 2014 at 0900. A reminder will be sent out a couple of days ahead of time.

Wishing everyone a safe Independence Day weekend!

Steve Tivel, Analyst
Regional Intelligence Group
King County Sheriff's Office
(206) 263-2561
stephen.tivel@kingcounty.gov

Meet(s) on the first Thursday of each month at the KCSO CID in the Sam Hicks Conference Room (2nd floor of the KC Admin Building); and then we meet on the third Thursday of each month at the Seattle Police Department HQ, lower level. Meetings commence at 0900 hours.

KCRIG Meeting Description

- The KC RIG members meet twice a month. The members are from multiple law enforcement agencies: local, state, and federal. Our meetings usually last about one hour to an hour and a half. The purpose of the meetings is to share information that is relevant to all members about persons, organizations, or events that may interest LE agencies in multiple jurisdictions. Often, the information is the kind of information that may not fit into a published intelligence document, such as a BOLO - or might be information that is more appropriate for discussion at one of these Intel meetings as informational or for the purposes of de-confliction.

December 2014 RIG – WSP Tip

While trolling through social media to see what the anarchists have in store for us tonight, I ran across this on the page belonging to **Melvin T. Neifert** DOB 8/21/1975.

It looks as if they obtained the op order through a PDR, likely made by **Andrew C. Hendricks** DOB 9/20/1968.

Thought you might be interested, and might want to let your guys know.

Domestic Terrorism Conferences

- The WSP and WSIN sponsored these conferences from 2001 through 2009 in Spokane, and in 2010 and 2011 they were sponsored by the Oregon State Department of Justice in Portland, Oregon.
- The Conferences happened each October, usually late in the month but as early as the first weekend. They were organized between June and September each year, and usually invited around 150 - 200 Law Enforcement officers, Detectives, and Security Professionals each year.
- The Conferences in 2004 through 2008 produced a “DT Book” which was referred to in several emails we obtained through public records. **This “DT Book” was a Compact Disc which held Index Entries on activists and users of political violence (other than police).** It was distributed to participants in the conference so that they could regionally share information about **“known activists.”**

DT Conferences, Continued:

Four of the DT Book Index Entries were accidentally released in August of 2011 and reviewed as part of the lawsuit against US Army spy John Towery. They were profiles of three activists from Olympia and one Graffiti artist from Tacoma. The three from Olympia were associated with PMR / SDS and the activist from Tacoma was associated with literature he had picked up at the Pitch Pipe Info Shop in Tacoma and had in his backpack at the time of his arrest.

None of the four persons had been convicted of any violence before they were listed as DT index entries in July 2007 in preparation for the Conference. These specific four entries were sent to the FBI in December 2007 in the wake of events in Olympia Washington, likely as a result of track sabotage done during a PMR protest in November 2007.

The Washington State Patrol currently maintains at least 731 database entries detailing persons suspected of "Domestic Terrorism."

(Public Records Act Response - July, 2013)

DT Conferences, Continued:

The DT database entries are part of a larger data sharing effort which compiled **at least 1,278 pages on persons living in the Western United States, including California, Oregon, Washington State, Utah, Montana, Arizona, Colorado, and Nevada between 2004 and 2009.**

This network extends beyond the formal WSIN boundaries and included the Anti Defamation League office in Seattle in at least one year. **Note that these databases have NOTHING to do with Gangs.** The HIDTA reports on Washington State gangs that:

“As of 2010 there are approximately 300 active street gangs in Washington State with approximately 15,000 active gang members. This equates to 14 percent of the street gangs and 44 percent of the total street gang members in Washington, Oregon, Idaho, Montana, Wyoming, and Alaska. According to Gang Expert Gabe Morales, one explanation for these statistics is that street gangs in Seattle and King County tend to be large. Many of the smaller gangs were pushed out or members were absorbed by larger gangs. Street Gangs totaling more than 250 members are not uncommon in King County and some have close to 1,000 members.”

CRIMINAL ACTIVITY:

Assault, Criminal Trespass. Dunn becomes aggressive during protests and demonstrations. Involved in an assault against a police officer.

SUBMITTING OFFICER AND AGENCY: Det Sgt Chris Adamson/Pierce County RIG 5

Federal Terrorist lists

- **THE KST Files**
- In addition to this semi-formal database sharing effort, the WSP also maintains what it calls the “**Known or Appropriately Suspected Terrorist**” files, or KST files, as a portion of its ACCESS database for general law enforcement reference. This is a totally separate database with a formal auditing system and an official status. This is ONLY information which is pushed DOWN onto WSP from the Federal Government, in contrast to the “DT Book” which lists activists horizontally nominated from participating agencies. **Persons might appear in both databases.**

Western States Information Network (WSIN)

- **296 Washington state agencies**
 - **1300+ WSIN**
 - **8200+ RISS**
- **WSIN Consists of Alaska, California, Hawaii, Oregon, Washington, as well as Canada, Guam and New Zealand**
- **Provides secure information and intelligence sharing capabilities**
- **Enhances officer safety through deconfliction**
 - **Deconfliction allows officers to check if another agency has an active investigation involving the same person(s) of interest**
 - **Notifies officers of potential conflicts with other agency investigations**

Regional Information Sharing Systems

Rapid Deployment Forces

- Regular WSP Troopers with special training.
- RDF Teams in Districts 1, 2, 4, 7, and 8.
- Each RDF team is two squads of around 10 – 14 Troopers, for ten total squads, 141 officers.
- Typically these are seen in “hard gear” at protests and civil disturbances.
- Often augmented by local police teams in riot gear, especially at multi day events.

RDF Teams' Purpose is Protest

- The RDF Teams are groups of WSP Sergeants and Troopers who are dressed in riot armor (padded elements intended to deflect blows and hand thrown projectiles) and helmets.
- They organize in teams and train as a military style unit, for formations and tactics designed to disperse or corral protesters and rioters.
- RDF Forces are the main “demonstration management” team which WSP puts into the field. They form the core of the State Patrol’s ability to put down strikes, manage demonstrations, and face a determined and organized opponent. This is the core of what state police forces were designed to do in the early 1900’s in the United States, so that Sheriff’s Deputies who were local to an area (and their elected bosses) would not be unduly influenced in a labor dispute.
- It is not typical for all RDF teams to ever be deployed at the same place at the same time, but it does occasionally happen for very large demonstrations. Normally the teams will be 12 hours on, 12 hours off and rotated (so that each team will field one of its two squads in any one 12 hour period, or alternate teams will rotate their pairs of squads into and out of a situation together.) This means that the total RDF personnel expected in the field at any one time is about 65 or 70 persons including command elements. RDF units nearly always deploy with explicit coordination with local Sheriff’s and Municipal Police officers, who may also deploy their own teams in riot gear. This is known as “mutual aid.”

RDF Markings

- Helmet numbers are Badge Numbers
- Car license plates are these same Badge #s.
- Gold numbers are Leadership (Sergeants +)
- White numbers are troops.
- Lack of any of these elements marks local Riot Squad Teams apart from WSP RDF.

Determining which RDF Team

There are five main WSP RDF teams, each of which has two squads (about 12 persons each, about 138 persons total for all teams in 2012). Each Squad is led by a Sergeant, whose badge number is printed in gold on the front and back of his or her helmet next to a red horizontal stripe. The ordinary trooper has a white number on his or her helmet, front and back.

The squads can be known either by this Sergeant's number or by the color they all wear as a reflective stripe across the rear armor at the shoulders and across the front of the armor near the midriff. This color system allows officers in a team to immediately understand their position in a mixed or larger the formation between two separate units. The red stripe and gold number Sergeant's helmet also lets them know who is in charge at a glance. This system can be crucial for knowing which teams you're looking at, who is in charge of the team, and who is on the team.

Always take photographs or notes on which helmet numbers of officers appear at a demonstration. This data can be invaluable for later public records requests and for suits which might arise from an incident with the RDF team. Anyone observing a site of a planned demonstration should have a reference with them so that cars matching the RDF lists (Cars for WSP have the badge number as the License Plate in a XXX WSP format) can be noted for activity in the area before a demonstration. When RDF teams deploy, they typically stage at an area they expect to be able to control, two or three blocks from the scene. If they are further away, they will coordinate with local bus systems like Intercity Transit to ship in teams of armored RDF troopers further than they would want to march. These buses will double as holding cells if they make mass arrests.

Buses used for RDF teams

INTERcity
TRANSIT

Subject: RE: Intercity Transit

WSP No. C140377

Mark-

I would like the bus here at 12 noon. The bus will be parked
we'll have the lot cordoned off. Also- I will need the name c

Thanks,

Sgt. Dorsey

MEMORANDUM OF UNDERSTANDING BETWEEN

STATE OF WASHINGTON
WASHINGTON STATE PATROL

AND

INTERCITY TRANSIT

THIS MEMORANDUM OF UNDERSTANDING, is made and entered into by and between the Washington State Patrol, hereinafter referred to as "WSP," and the Intercity Transit, hereinafter referred to as "Other Party."

THE PURPOSE OF THIS MOU is to establish the role and responsibilities of WSP and Other Party associated with the transportation to be provided by Other Party to WSP during public demonstrations or events at the Capitol Campus or in the City of Olympia.

IT IS, THEREFORE, MUTUALLY AGREED THAT:

Statement of Work:

WSP may be required to assign troopers, personnel, or equipment to ensure public safety and/or perform traffic or crowd control activities at certain demonstrations or public events, which may be held at the Capitol Campus or a location in the City of Olympia.

Local Police Riot Teams

Valley Civil Disturbance Unit

Fifteen Tukwila Police Officers serve as members of the Valley Civil Disturbance Unit (VCDU). This team, made up of officers from surrounding jurisdictions, responds to the need for a large well-trained and organized police presence at any type of large gathering. The team is composed of members with specialized training for less lethal munitions and chemical crowd-control agents, safe removal of protester devices, and bicycle response. Members have provided crowd control at the Rock & Roll Marathon as well as quelled civil unrest at protest events.

Officer Mike Murphy is the training officer for the VCDU. Tukwila Police coordinates the annual team training at Fort Rilea, Oregon. This event prepares team members for the challenges they may face in the field. Every aspect of team response from command preparation to the response to riotous situations is tested and improved.

Mike Murphy

Local Police Riot Teams

Similarly organized as the Valley SRT, Auburn Police Civil Disturbance Unit (CDU) are members of the Valley CDU, comprised of Auburn, Tukwila, Renton, Kent, Federal Way and Port of Seattle Police Departments.

Seattle Police Bike Squad

“The Barrier technique involves lining the bikes, front wheel to rear wheel, across the area to be blocked or protected. The squad leader and assistant squad leaders (ASL) are positioned behind the line. The ASLs assist with arrest, relay line orders, and watch the crowd for thrown objects. They may be armed with long-range, less-lethal weapons (bean bag guns, shotguns with LTL loads, pepper ball guns) as well as large OC canisters and/or personal-sized fire extinguishers. When forming a barrier in front of a building, it is important that a safety zone is retained behind the line so that a crowd surge does not force the line into a dangerous position.”

James K Dymment – Bike Founder

I have been involved in crowd management in a variety of capacities in my 23 years on the Seattle Police Department. I started my training for crowd management in the preparations for the 1993 Asian Pacific Economic Conference that was held in Seattle in 1993. I was an officer at this time and was trained in the traditional riot control tactics of the time. Our equipment was the same as officers had in the 1970's. This consisted of an "ironwood" long baton, a helmet with dubious protection capabilities with an attached shield, and a blue jumpsuit that was of poor quality and fit. The next significant event that I was involved in within the Demonstration/Crowd Management realm was the WTO Conference in 1999. The Seattle Police Department sent me to a Riot and Disturbance Control Instructor course in British Columbia. Although I was on a bicycle squad at the time, there were no roles for the Police Cyclist in our Demonstration Management, outside of monitoring peaceful parades or demonstrations. It was during the WTO event that the initial Demonstration / Crowd Management tactics were developed for the Police Cyclist for the violent and or unlawful crowds as traditional methods faltered. I developed the initial tactics and training plan based on the many lessons learned in WTO for the police cyclist. We first deployed using the new tactics in during the 2001 Mardis Gras riot (s) with great success. Since that time I have been involved in a variety of capacities in hundreds of demonstrations and spontaneous crowd management situations. Some of the more significant events include N – 30 (this was a series of events that was held on the anniversary of the WTO event in 1999 that involved planned/direct action protests and demonstrations) Mardis Gras (2001-2004), LEIU (Law Enforcement Intelligence Conference Demonstration), May Day 2013-2015, and Superbowl 2014 which were all events with significant crowd control issues.

James Kermit Dymment #5790 206-786-2783

Seattle PD Bikes used in protests

ABOUT BIKE PATROLS

To join the unit, every Officer must complete a week long training session where they receive specialized instruction. From riding up and down stairways to cone courses and emergency dismounts, officers who complete the session are capable of a vast array of maneuvers on a mountain bike.

Today there are day and night bike patrol squads proactively participating in undercover and on view narcotics enforcement, crowd control and continually responding to 9-1-1 calls. While the West Precinct (downtown) carries the largest squad, every precinct in the city utilizes bike patrols in providing police services to the city.

Bikes used to push persons

- The barrier can easily become a moving tactic called "mobile fencing" if the team leader determines that the crowd needs to be moved. Upon command, the bike team readies itself to move forward by holding the bikes by the stem and seat post. At the order, the squad members lift their bikes to chest level and, pressing them toward the crowd, take one step forward while ordering the crowd to "Move Back!" The squad then resumes its original stance. The "move" command is repeated as necessary. It is essential that the line is held intact, as the crowd will quickly exploit any gaps.

Bikes used to flank groups of people

- Although the police bike squad works extremely well with other units on the front lines, it also works well on the periphery an incident. ***The speed and mobility of the squad allow it to quickly outflank a crowd if it moves in an undesirable direction.*** A squad or two of bicycles positioned several blocks away from the action can be moved in a fraction of the time required to move a foot squad or even a vehicle squad, as bikes are not hampered by stairs, traffic, or a lack of roads. This mobility makes the bike squad the ideal back-up unit for the interior officers. ***In addition, the strong flanking presence provided by the bikes can discourage people on the outskirts from joining the main group.*** The bike squads also function as crime suppression units left on the periphery to deal with those who would take advantage of the diverted attention of the other officers.

Bike equipment geared to crowds

- The squad should be equipped with the following items: **gas masks, large OC spray devices, flexcuffs, first aid kits, fire extinguishers, and a long, lockable cable.** If it appears as if the squad will be on the street for an extended period of time, it may be appropriate to equip a support vehicle with complete wheel and tire sets, both front and rear; spare chains, tubes, a pump, water, and snacks. **Long sleeves and long pants are recommended for added protection, even in hot weather, and use of arm and leg padding may be appropriate.** Other departments use lightweight motorcycle helmets to provide extra protection yet allow easy use of a gas mask, personal hydration devices worn on the back, and earbuds for the radios to ensure good communications. The list could be endless; but regardless of the equipment carried, it is essential that the bike squad practice with it prior to implementation.

Bikes have vulnerable tires

This was comment from Lt. Andrew Popochock:

I was just thinking about something for next year. For the last two years we have effectively used bikes to contain the anarchist protests. This year they tried to increase their mobility by running and splitting into small groups. This was again ineffective. We need to consider the fact that they see bikes as their biggest obstacle and may take direct action against them in the future. The most effective way to do this is to use caltrops or large push pins dropped on the street. Bikes don't work well if everyone has flat tires. Caltrops have been used effectively against horses in the past and small ones are easily deployed in large numbers. As are large push pins. And hard to pick up. I think it would be a good consideration for next year to come up with a contingency plan for this event.

Non Ferrous metals are harder to sweep with magnets

The hollow spikes puncture self-sealing rubber tires. The hole in the center allows air to escape even if the other end of the tube is sealed by soft ground.

WSP Aviation

This is a view of what the WSP's Cessna 206 used to look like in 2005-2013. The WSP has two of these, and they use them to monitor protests they are worried about. The camera ball was moved to the wing in 2014. They also use these for DUI and speed enforcement as well as securing Navy vessel transits out of Navy Base Kitsap. This camera overlays a map on the view it shows the tactical flight officer so he instantly knows the address he sees.

New FLIR Camera

FLIR 380HDc **Mounted on Wing**

Major Upgrades in 2014

2014: FLIR 380HDc WITH UPGRADED TACTICAL
FLIGHT OFFICER STATION.

Augmented Reality System

- GPS linked Moving Map overlay on FLIR display seen by Tactical Flight Officer.
- TFO instantly sees addresses of the houses he is watching and also sees street names.
- TFO sees vehicle speeds measured by laser range finder in about 15 seconds.
- ARS Installed in WSP Cessna in March, 2009.
- Laser enabled system installed early 2014.

ARS Map View with Infrared Camera

WSP used US Navy Money for FLIR

*“Starting in 2005, the WSP Aviation Section significantly enhanced its aerial public safety capabilities through **federally funded day/night FLIR camera and microwave downlink systems**. These technology upgrades allowed WSP Aviation Section personnel to better examine traffic safety problems and expand their missions into nighttime hours in support of agency missions and goals. These upgrades also added a new dimension to the Aviation Section’s ability to effectively provide aerial law enforcement and public safety services.”*

“Initial funding was obtained as a result of an innovative partnership with Navy Region Northwest (NRNW), while subsequent federal funding was obtained from the Urban Area Security Initiative (UASI).”

- WSP 2009 Herman Goldstein Award Submission For Excellence in Problem-Oriented Policing

Navy Money was a response to protests

“On the night of **18 November 2004**, individuals unaffiliated with OMJP gathered around the port fence, cutting a large hole in it, prompting heightened security measures.[8][9] **Some witnesses have claimed this breach in security prompted the USNS Cape Intrepid to leave early and without all its intended cargo**, while the military maintains there was no disruption to its operations.[10]”

- *Wikipedia Article: Port Militarization Resistance, citing:*

<http://www.infoshop.org/inews/article.php?story=04/11/19/2646466>

“In **2005, Navy Region Northwest sponsored a federal grant** to purchase Forward Looking Infrared (FLIR) and other high-tech surveillance equipment for two WSP airplanes. State Patrol pilots utilize these airplanes to support homeland security, traffic enforcement, and public safety missions including search and rescue. “

- *Rear Admiral James A. Symonds, Commander Navy Region Northwest (WSP Press Release August 14, 2009 announcing an IACP award for multi agency cooperation.)*

WSP and Navy and WA Military Dept 2005

Challenge: Completion of FLIR Contractual Requirements

- Complete initial troubleshooting of FLIR & downlink systems—Target: Dec 29th
- Complete testing of WSP & Camp Murray central receiver sites—Target: Jan 10th
- Install and test the Kitsap Navy central receiver site—Target: Jan 11th
- Complete installation of FLIR on the 2nd Cessna—Target: Jan 15th
- Complete operational testing, troubleshooting, and billing—Target: Feb 17th

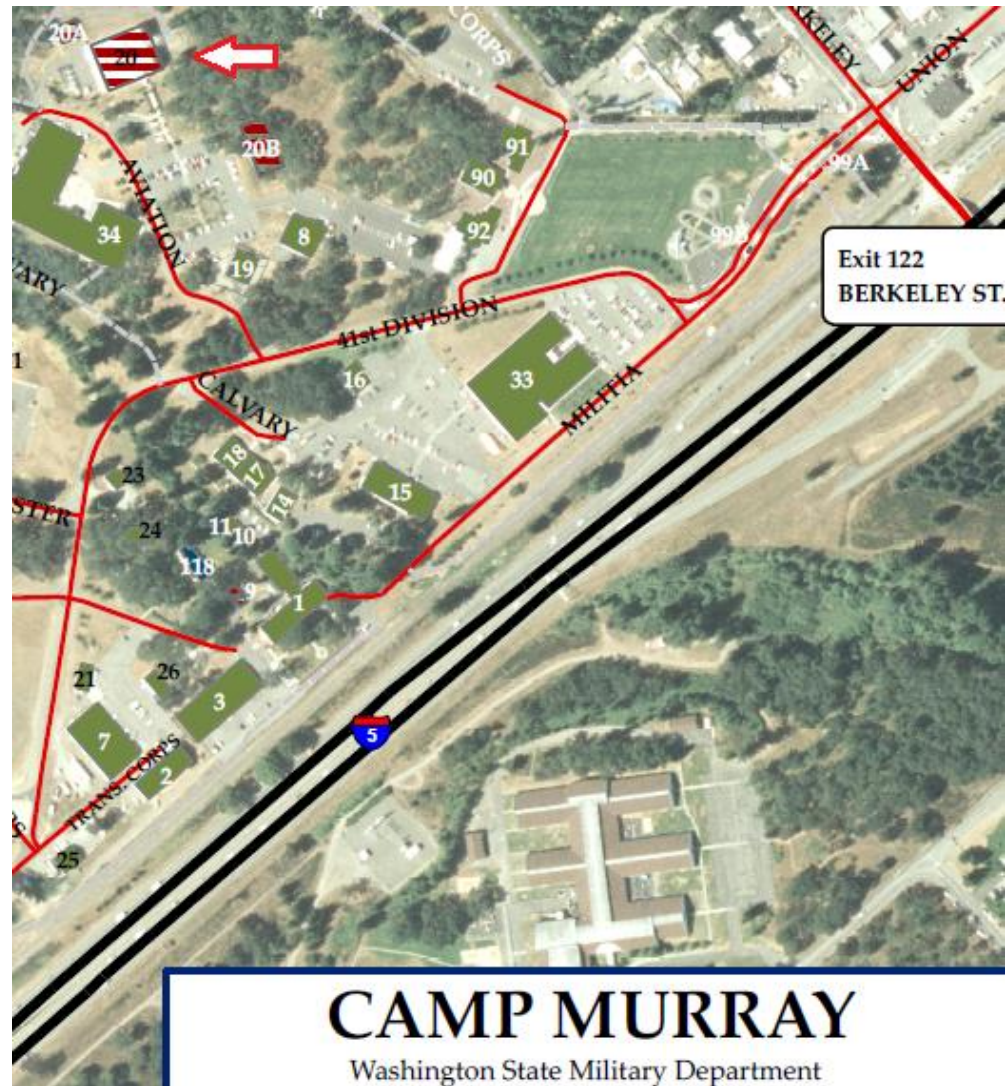

What are we doing?

- Working closely with the Navy, PMD, and BMS to coordinate the central receiver installation on the Navy's tower in January.
- Working with the Vendors—FLIR Systems and BMS—to troubleshoot problems.
- Utilizing all resources to complete the FLIR installation on the 2nd Cessna.

Camp Murray – WSP Video Link

Camp Murray EMD location

Video Downlink Details

The Heli-Coder II (HCII) is a COFDM digital microwave transmitter system intended to downlink live video from an aircraft. The system encompasses a Carry-Coder II, a BPA-10CC power amplifier, and an HCP-50-HCII control panel.

A pioneer in Digital COFDM Technology, BMS' Coder II line of products offer low delay, 4:2:0/4:2:2

MPEG-2 encoding and decoding, RF amplification, and COFDM modulation for non-line-of-sight operation. Standard features include ASI In/Out, SDI and Video Out.

Video Downlink Details

- ▶ Simple Setup and Operation
- ▶ GPS Data Option
- ▶ PIN Scrambling System for Privacy
- ▶ Intuitive Operator Controls
- ▶ Fully Standards Compliant

Companion Systems:

- ▶ TAA-101 Omni Actuator System
- ▶ GCA-11 Airborne Directional Antenna
- ▶ GCA-4 GPS Steerable Antenna System

optional dedicated GPS receiver may be added that allows automatic tracking by specially equipped ground stations.

GIIEP Acronym

GIIEP is a National Guard Bureau (NGB) operational system. Prior to fielding, GIIEP was **developed by US Army Space and Missile Defense Command Battle Lab (SMDC)** in conjunction with AFNORTH/A8 to answer capability gaps in the AF Rescue Coordination Center (AFRCC) and for air component Full Motion Video (FMV)/Incident Awareness and Assessment (IAA).

GIIEP uses 3G Cellular Networks

- The GIIEP system has **organic 3G cellular communications** (primary) and **satellite telephone communications** (iridium, secondary). The GIIEP system transmits Full Motion Video and/or still images via the internet to the primary server farm located at the USGS in Sioux Falls, South Dakota and a redundant server farm in Huntsville, AL. ***All authorized users who have a username and password can access FMV and still images from these server farms making the system completely interoperable throughout the interagency spectrum.***

Fake Identities for Cops

Ms. Ashley Moore
Department of Licensing
Driver Services
PO Box 9030
Olympia WA 98507-9030

Dear Ms. Moore:

Request an undercover driver's license for Detective (____). His date of birth is (____), his driver's license number is (____) and his fictitious name, address, and physical description will be as follows:

Fictitious Name

Street # & Name

City, State & Zip Code

Date of Birth:

W/M; 'height'; ?lbs; Hair Color; Eye Color

Thank you for your assistance in this matter. If you have any questions please contact Lieutenant Randy Drake at (206) 262-2418.

Sincerely,

[Signature Block]

WSP Statewide Radio

Washington State Patrol's Land Mobile Radio Systems:

To serve its wireless communications needs, WSP has a statewide analog conventional VHF radio system with more than 100 transceiver sites located throughout the state connected by a 6-gigahertz (GHz) analog and digital microwave. The agency's LMR and microwave systems serve as the backbone system for other federal, state, and local agencies.

One of the state's primary interoperability channels, the Law Enforcement Radio Network (LERN), is licensed for statewide use by WSP, and is available to use by other local agencies with approval.

In addition to an extensive voice communications system, WSP operates a UHF network for mobile computer network (MCN) laptops that provide basic email and records access capabilities. However, this data system runs on an outdated legacy operating system at very low transmission rates. This mobile data system is high on the priority list to be updated with new MCN equipment that can be fully integrated into the computer aided dispatch system that was upgraded in 2003.

The technical architecture and equipment configuration for the LMR system is summarized below.

- Statewide operations organized in eight districts.
- Primary component manufacturers are Kenwood, Motorola and M/ACOM.
- Total dispatch centers is eight; with a total of 39 consoles.
- Operational base station and repeater sites 215.
- Subscriber units total 3830; 2440 mobiles, 1300 portables.

WSP logs GPS of its cars

System (GPS) coordinates. Once the officer logs into PMDC, the laptop transmits the GPS coordinates to a server located in Tumwater, Washington. Before April 29, 2013, the server was called the Automatic Vehicle Location (AVL) server. Currently, the GPS data is transmitted to the P1CAD server located in Tumwater, Washington. After April 29, 2013, the AVL information stored in P1CAD is now called Automatic Resource Location (ARL). The majority of the GPS data currently retained by the WSP is in the ARL database.

4. Since PMDC and ARL are part of the CAD system, I administer the CAD software that provides GPS data.

5. The laptop's GPS receiver requests data from satellites and transmits the data to the P1CAD server based on the following variables: (1) the officer's status; (2) the vehicle's velocity; and (3) the distance traveled.

6. A ping rate is how often PMDC sends the GPS data to the P1CAD server.

7. When the officer begins his or her shift, the officer signs into service through PMDC on the laptop. During the shift, the officer may change status based on the activity he or she is performing. For example, an officer who stops a motorist for speeding would create

or she is performing. For example, an officer who stops a motorist for speeding would create an incident and his or her status would automatically be changed to arrived (AR). Since the officer has changed his or her status to AR, the ping rate changes to 20 minutes.

8. Speed can increase the ping rate due to the fact that the vehicle is covering a greater amount of distance in a shorter period of time.

9. Distance can trigger a ping to the P1CAD server. For example, if an officer has arrived (status AR) at a collision, the ping rate is changed to 20 minutes. However, if he or she moves the vehicle with the laptop 500 feet, another ping is sent to the server.

10. The laptop transmits the following information to the P1CAD server: (1) the date and time of the record; (2) the vehicle ID; (3) the officer's unit ID; (4) the incident

WSP Special Teams

- **Bomb Squad**
 - Three Regional Teams
 - Bremerton, Marysville, Olympia
- **Special Weapons and Tactics**
 - Two entry teams
 - Blue Team / Gold Team
 - Sniper / Observer teams
 - Negotiator / Intelligence teams

Local Police SWAT units

Valley SWAT/CCU

Special tactical needs of the city are provided by Valley SWAT, a regional team comprised of six officers and a commander from each of the cities of Tukwila, Renton, Kent, Auburn, Federal Way, and the Port of Seattle Police Department. In 2011, the team responded to 50 incidents in these jurisdictions. Most of these incidents involve the service of high-risk search warrants, usually involving narcotics. Other common operations include dignitary protection details, arrests of dangerous suspects, and responses to barricaded subjects.

The team is very fortunate to be well-supported by the agencies they serve. It is well-equipped and trained, having the benefit of training three days per month with one additional week-long training session per year. Although these 36 officers train hard and are subject to callout any time of day, every day of the year, SWAT is not a full-time job – each of the officers has a primary assignment within their own agencies, be it as patrol or traffic officers, detectives, or the like.

Valley SWAT is one of the largest teams in the State, and, due to its strong reputation, works closely with many of the other top teams in the region, including Seattle PD SWAT. This inter-agency camaraderie leads to an effective exchange of concepts and expertise, making for more effective emergency responses and ultimately a safer community for you, the citizens we serve.

Seattle Police SWAT / 2012

CEMNET II

Emergency Management Radio Systems Operations **SECURE - HF**

The Operations SECURE (State Emergency Communications Using Radio Effectively) high frequency (HF) net (also known as **CEMNET II**) is a secondary emergency back-up communications capability for intra- and inter-state use.

Operating on eight discrete frequencies, point-to-point long-range communications between the state EOC and fixed or mobile HF stations can be established as needed. Currently, in addition to the state EOC, fixed HF stations are located in each Washington State Patrol (WSP) district communications center.

The HF frequencies assigned are:

- 2.326 MHz (Upper Sideband (USB))
- 2.411 MHz (USB)
- 2.414 MHz (USB)
- 2.587 MHz (USB)
- 2.801 MHz (USB)
- 5.192 MHz (USB)
- 7.801 MHz (USB)
- 7.935 MHz (USB)

STAEN

Emergency Management Radio Systems State Agency Emergency Net (STAEN) - 800 MHz

The State Agency Emergency Net is a radio net employing an ultra high frequency (UHF) 800 MHz repeater that has been incorporated into the Washington State Department of Transportation's (WSDOT) 800 MHz trunked radio system on Capitol Peak. The net was primarily designed to provide a capability for state agencies within the Capitol Campus, Tumwater, Lacey, and surrounding areas to communicate with the State Emergency Operations Center (EOC) during emergency situations or disasters which severely impact or restrict the use of "normal" telephone services. It can also be used to communicate among agencies during an emergency situation, as needed.

State agencies have been encouraged to procure equipment and participate in the net. Currently, eight agencies have done so. They are:

1. Department of Social and Health Services (DSHS).
2. Department of Agriculture .
3. Department of Community, Trade, and Economic Development (CTED) - Energy Division.
4. Department of Health (DOH).
5. Department of Information Services (DIS).
6. Department of Labor and Industries (L&I).
7. Department of Retirement Systems (DRS).
8. Office of the Governor.
9. Office of the State Auditor.
10. Utilities and Transportation Commission.
11. Employment Security Department.

Other Radio Nets

Mobile Emergency Response System (MERS)

The Federal Emergency Management Agency's (FEMA) Operations Net, a VHF high-band system primarily used by FEMA MERS for communicating with FEMA personnel. For EMD purposes, this net is used as a secondary capability for communicating with FEMA Region X and MERS Operations located in Bothell, Washington.

FEMA National Radio System (FNARS)

FNARS is a high frequency (HF) system primarily used by FEMA for inter and intra-state communications between FEMA Headquarters, FEMA regions and the states during national and/or regional emergencies, particularly when land line systems are impaired or restricted. An FNARS HF transmitter/receiver, a 1000 Watt Collins radio, was installed by FEMA in the State EOC.

State Area Command (STARC) Net

STARC is an HF system primarily used by the Washington National Guard for intra-state emergency communications between Headquarters, STARC in Camp Murray, and each Army/Air National Guard armory/station. It is also used by the Guard for interstate communications with other National Guard units. For EMD purposes, this net is to be used as a secondary capability for communicating with local jurisdictions and deployed National Guard units.

The Emergency Management Division (EMD)

The EMD also has access for emergency purposes, to VHF systems operated by the Washington State Patrol (WSP) and Washington Department of Natural Resources (DNR).

Washington's Prisons

Washington State Department of Corrections

The Washington State Department of Corrections (DOC) is organized into several divisions providing operational and administrative oversight and services. Of these divisions, the Prisons Division and the Community Corrections Division utilize and maintain radio communications equipment.

The Prisons Division oversees 15 institutions organized into three Departments (East, West, and Central) each having a designated administrator reporting to the Deputy Secretary – Prisons Division.

The Community Corrections Division oversees 15 work release facilities and 118 community corrections field offices. Operating regions are designated as Work Release and Community Corrections Regions 1 through 7, each having an appointed administrator responsible for locations within their defined boundaries, and reporting to the Deputy Secretary – Community Corrections Division.

DOC's land mobile radio systems:

The Department does not maintain an infrastructure for data and voice transmission shared by other agencies. Each DOC facility is a stand-alone system, with provisions for extended communications to support specific departmental programs and activities. The Department's LMR systems are described according to the type of facility below.

Washington Military Department

WSP – Navy Liaison

From: Wilbur, Roger (WSP)
Sent: Wednesday, October 08, 2014 10:25 AM
To: Old, Chris (WSP)
Subject: RE: Navy Exercises

Chris,

Here's what I found out (tried to call you but didn't hear back). The aviation section is committed to participating in the exercise. In preparation, they took the "new" admiral up last month to show him their capabilities specifically anticipating this exercise. Aviation has been in continual contact with the Navy regarding this exercise and plans to participate as necessary/expected.

Here's the hitch...in preparation for the exercise the Navy has scheduled many planning meetings leading up to it. Two meetings were scheduled for this week. However, in order to access the Navy base, security clearance is needed and now that Korthius-Smith is no longer in the Navy, none of the pilots have the necessary security clearance to access the base and attend the meetings. The cost of obtaining the clearance is \$15,000 based on required background checks etc. Aviation has been working with the Navy to fund the cost of the needed clearance. Just in the last couple weeks the Navy agreed to fund the cost and Trooper Ryan Santhuff will be obtaining the clearance. He has submitted his paperwork and the rest is up to the Navy. It is expected to take 3-6 months to obtain the clearance so he will be able attend future meetings once the clearance is granted.

In short, aviation is committed to participating in the exercise and plan to participate as requested but the necessary security clearance issue has gotten in the way of attending the meetings leading up to this particular exercise. Lt. Nobach said he has previously contacted Sgt. Gailen Hester to coordinate the exercises and will touch base again with Sgt. Hester regarding this one. Hopefully this helps clarify the situation.

Urban Area Security Initiative

- The Urban Areas Security Initiative program allocates \$500.4 million to enhance regional preparedness in major metropolitan areas throughout the United States.
- The UASI program directly supports expanding regional collaboration and is meant to assist participants in their creation of regional systems for prevention, protection, response, and recovery.
- States are required to ensure that **at least 25 percent of appropriated funding is dedicated to terrorism prevention planning, organization, training, exercise, and equipment.**
- State Administrative Agencies (Department of Public Safety, State Office of Homeland Security, Emergency Management Agency, etc.) are the only groups eligible to apply directly to FEMA for UASI grants.

State Map of the Seattle Urban Area Security Initiative (UASI)

State LEO Grant Management

The SIEC serves as a part of the state of Washington's multi-jurisdictional Domestic Security Infrastructure, "Team Washington." "The vision and collective commitment of TEAM WASHINGTON is to reduce our vulnerabilities and defend against the disasters created by domestic attacks and natural or technological hazards."41 This infrastructure consists of:

- **Domestic Security Executive Group (DSEG)** - the state government executive level policy and advisory group to advise the Governor on all matters pertaining to state domestic security.
- **Emergency Management Council (EMC)** - Revised Code of Washington (RCW) 38.52.040 established this council to advise the Governor and the Director of Washington Military Department on all matters pertaining to state and local emergency management.
- **Committee on Homeland Security (CHS)** - a sub-committee of the EMC, the CHS develops and recommends statewide homeland security strategies to the EMC.

State LEO Grant Management cont

- **Enhanced 9-1-1 (E-911) Advisory Committee** – Chapter 38.52 RCW, Revised, established the State E911 Program to coordinate and facilitate the local planning, installation and operation of the E911 phone systems.
- **Regional Homeland Security Coordination Districts (RHSCD)** - The Washington State Homeland Security regional planning and coordination structure is divided into nine regions.

The regions are made up of one or more counties that include cities, towns, and tribal nations within the regional geographical boundaries. This regional configuration was implemented to distribute federal grant funds, develop emergency responder equipment priority lists, plan and execute training and exercise programs, create regionally based mutual aid plans, and develop volunteer infrastructure to support citizens' involvement in homeland security initiatives. This regional structure has increased communication and collaboration, to include the sharing of best practices and resource coordination. Operations and physical resources are maintained at the local jurisdiction (county, city, and tribal) level and coordination and planning are facilitated at the regional level.

Puget Sound Joint Terrorism Task Force

The Puget Sound Joint Terrorism Task Force was formed in 2000. Participating law enforcement and intelligence agencies provide personnel to the task force for extended periods of time to work with the FBI in conducting international and domestic terrorism investigations. Combining the skills, tools, and resources of the various agencies enables the task force to be more effective in preventing and solving acts of terrorism and supporting cases nationwide and worldwide.

Seattle Field Intelligence Group (FIG)

The Seattle Field Intelligence Group is a team of FBI analysts and agents that provides intelligence analysis to the Seattle Division and its partners. It works closely with the U.S. **Department of Homeland Security (DHS)** and the **Washington State Fusion Center**, a state-supported intelligence collection and analysis center housed in the Seattle FBI office and staffed by local and state law enforcement agencies.

Seattle Division Cyber Task Force

FBI Seattle Division Cyber Task Force addresses national security and criminal cyber intrusions and threats, collaborating with business and law enforcement partners locally and around the globe.

Computer Analysis and Response Team (CART):

These forensic investigators are certified to retrieve, preserve, and examine stored digital evidence found in computers and other electronic devices or media in support of FBI investigations.

FBI SWAT / Negotiators

Crisis Response: The two main components of this program are the **Special Weapons and Tactics (SWAT)** team and our **crisis negotiators**. The SWAT team consists of special agents who respond to FBI operations that pose a heightened risk to the public and to law enforcement.

In Seattle, those operations may include a rapidly developing crisis, high-risk search and arrest warrants, weapons of mass destruction and maritime operations, and dignitary protection. The SWAT team receives enhanced tactical training and maintains proficiency with a variety of special weapons and equipment.

Crisis negotiators work in concert with the SWAT Team in crisis situations, such as barricaded subjects, hostage situations, kidnappings, and potential suicides.

Resident Agency JTTFs

The **Everett Joint Terrorism Task Force** investigates international and domestic terrorism—including eco-terrorism—in Snohomish and Skagit counties. Task force members also coordinate with the ***Bellingham Counterterrorism Working Group***, which covers Whatcom County.

The **Inland Northwest Joint Terrorism Task Force** disrupts international and domestic terrorism activity throughout eastern Washington and northern Idaho. This JTTF is unique in that it fuses the efforts and combines the talent and resources of the FBI's Seattle and Salt Lake City field divisions.

The **South Sound Joint Terrorism Task Force** disrupts terrorist activity by synthesizing the efforts of the FBI, **US Army 902nd Military Intelligence**, DHS, Pierce County Sheriff's Office, Federal Protective Service, and the U.S. Marshals Service.

Subject: Attorney General Alberto Gonzales visit to Seattle

Attorney General Alberto Gonzales will be in the Seattle FBI Division on June 26 and 27. The FBI Field Intelligence Group has been tasked with preparing a threat assessment associated with that visit. They have requested WAJAC to contact the RIGs for any possible information that might impact the AG visit. Those responsible for the assessment, in the FIG, realize had you had any information on this subject you would have forwarded it to WAJAC. They were not being insulting but just covering all bases, however, you may not have been aware of any impending visit to begin with...we weren't until yesterday. If anyone has access to any college or university campus paper or weekly publication you might look through it for any possible protest action planned. Especially at Evergreen College. Please forward any information to the WAJAC.

These are all RIG analysts

WAJAC is the Washington Joint Analytical Center – what later was named the WSFC.

FBI is the lead agency on Nukes

The FBI Nuclear Stabilization Program (**STAB**) is finally approved for operational training and deployment here in Washington State.

Currently, in the event of a real world event involving a state sponsored nuclear device (SSND), an improvised nuclear device (IND), or a radiological dispersal device (RDD), the FBI has the primary mission for render safe and disposal operations. There are currently three FBI response teams, one is dedicated to the National Capitol Region (Wash DC), one is dedicated to the remainder of the continental US, and one is on training (reserve). In the event of multiple call outs, or an OCONUS call out, the US Military has the mission. The necessary expense to train, equip, and transport these teams requires their number to be limited. Since all teams are currently based on the east coast, response times to the west coast are approximately 12 hours.

To mitigate this response time, the Dept of Energy has agreed to fund the creation of twelve **STAB** teams, all FBI managed, throughout the US. (2012 era)

James Elliott FBI Bomb Technician Seatac Airport Liaison 206-571-6542

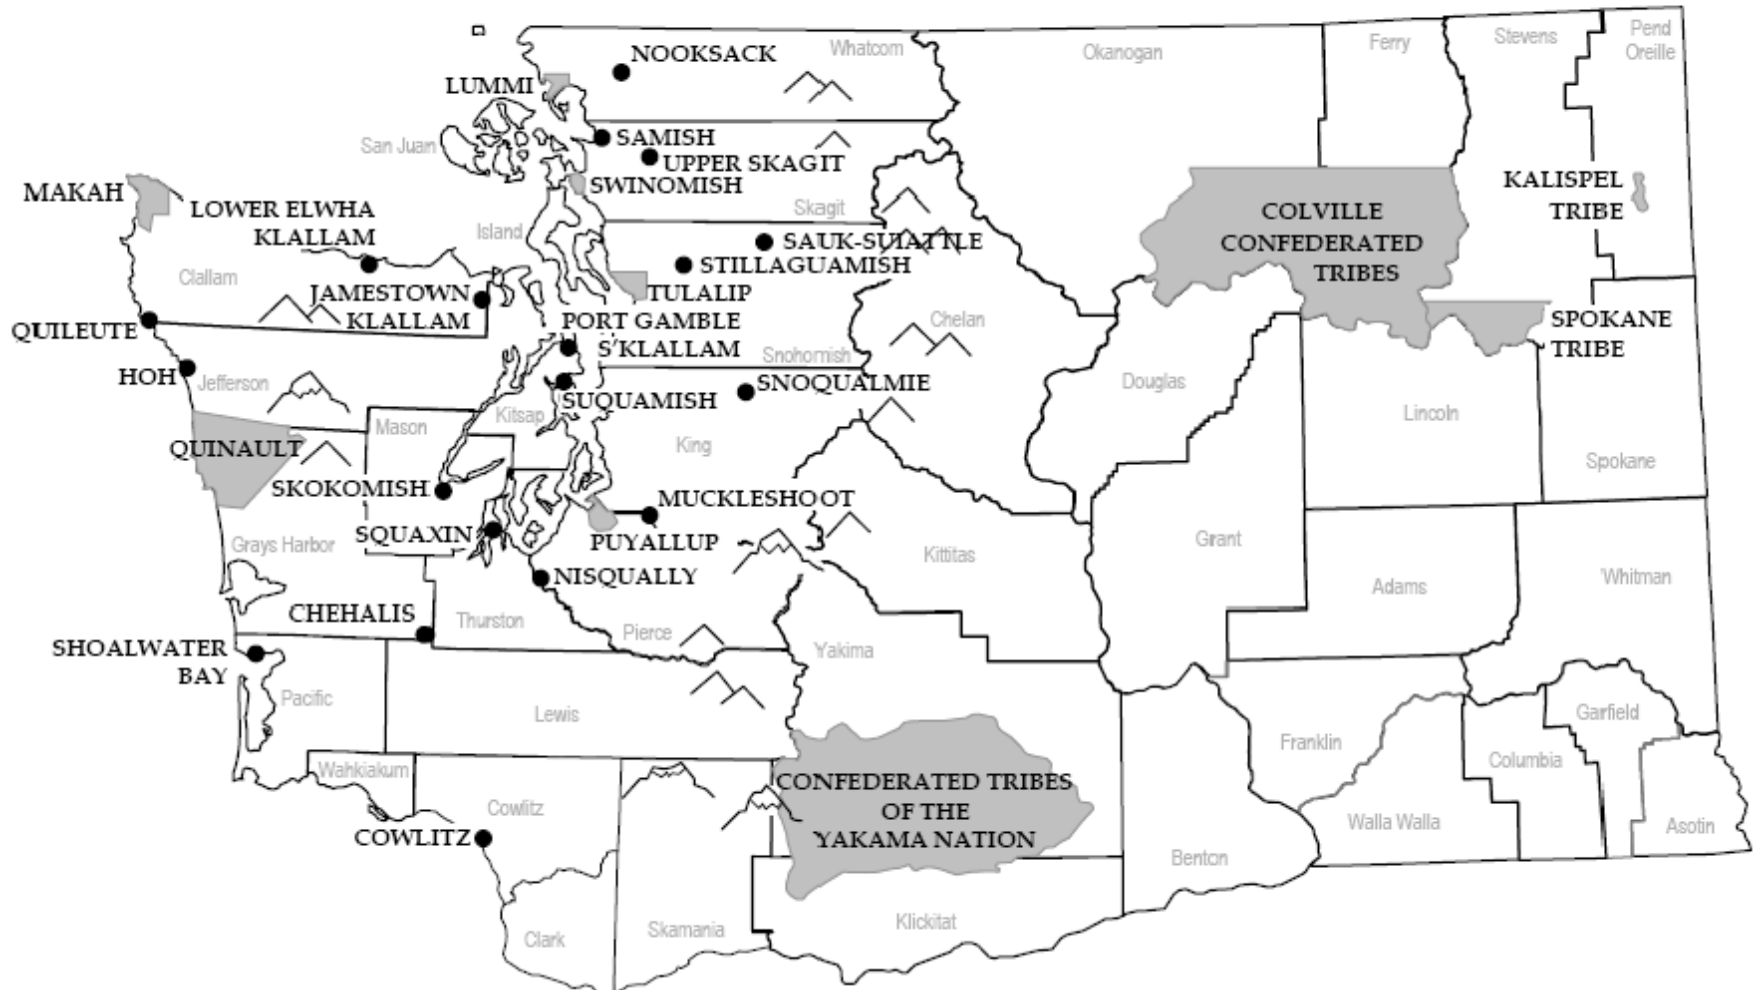

Special Agent Bomb Technicians: The three highly-trained special agent bomb technicians in the Seattle FBI office are capable of testing explosive devices, rendering them safe, and clearing them from crime scenes. They assist with all explosives related matters and work closely with local law enforcement and fire departments. They are trained on the latest bomb equipment including robots, x-ray machines, and mobile radiation detectors.

JHOC Situation in 2006

Intended JHOC endpoint, 2014 +?

Future Vision of Interoperability

Key to JHOC is integrating feeds

The Sensor Management Suite is key to the successful integration of data sources (such as cameras and radar) into the JHOC common operational picture. The U.S. Space and Naval Warfare Systems Command (SPAWAR) in San Diego developed this application with the deliberate intent of integrating disparate sensors into a common user interface. Cameras from different companies with different interface protocols can be incorporated readily, often within less than a day's effort. Thus, the JHOC can get radar and video feeds from almost any existing system belonging to a willing port partner, saving the aggregate infrastructure cost of installing a USCG-owned camera system and providing the communications backbone to bring the feed to the sector.
