Doug: it appears that email server is non-functioning. Initial login, you can choose 'temporary' or 'offline'. I chose temporary and inbox comes up…nothing inside. I tried sending email from the temp….my email is in 'sent' but my receiving inbox has nothing (I used seattle.gov and a Hotmail account). Barry tried replicating same process and gets same result. We are still down and out.

Subject: status update

Bill is continuing work on bringing up the new Exchange email server on vh04. He is slated to complete the work today barring anything unexpected. Andy got the new Blackberry server up and running yesterday on vh03 so it should link up to the Exchange server once the email server comes up. I'm not sure what happened to BES12 or what version of BES the Blackberry server is now. Andy is off today. Hopefully it is the same version as the Patrol's (BES10).

What a week!
